Section I - Unconventional Intelligence concerning the timing of Gaza rocket fire (astrology)

Here is the framework by which I have been able to outperform the Mossad and Shin Bet when it comes to predicting escalation of rocket fire from Gaza into Israel since 2019. There is a pattern in which the time frame of Mars's position within 30 degrees of the lunar node correlates with the highest concentration of rocket fire from Gaza into Israel in relation to the rest of the year. This has been demonstrated historically and in real time. The data is integral to inducing the faith needed to foster a religious, social, and economic system. After reading the data and demonstration, the reader should be able to contemplate the existence of another prominent force in the world and how such a force can be used to aid mankind. Following the demonstration, instructions on how to make use of this Mars force is laid out. Here are the charts of all the rocket attacks against Israel since 2007. Notice the times when there has been a spike in rocket fire relative to the year it happened. These statistics are taken from wikipedia

https://en.wikipedia.org/wiki/Palestinian_rocket_attacks_on_Israel.

Note: in 2019, the heaviest rocket fire from Gaza took place in May. 600 rockets were fired from Gaza on Israel

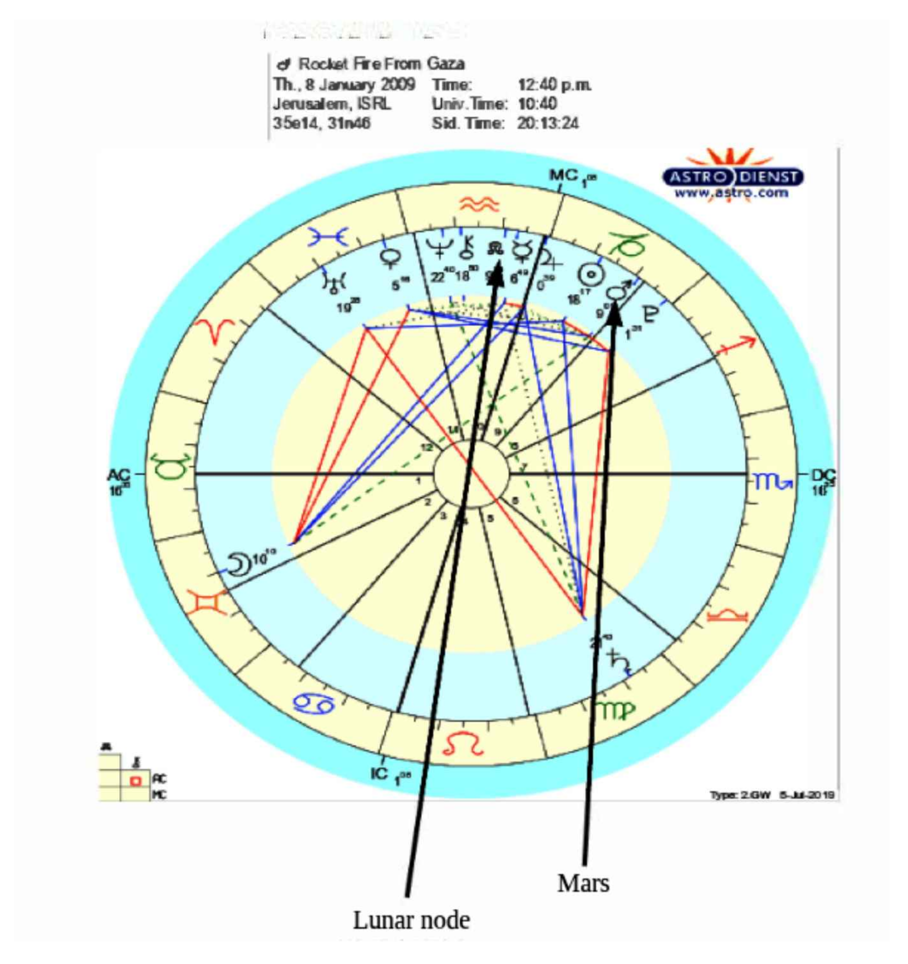

If we observe the number of rocket attacks from Gaza starting back around 2007 in "Figure H", you'll notice an asterisk next to some of the numbers. This indicates the month where the largest barrage of rocket attacks from Gaza were concentrated that year. We will reference "Figure H" when we pull up the astrocharts to see how the location of Mars correlates. In my research of how the position of the Planet Mars correlates to rocket attacks from Gaza, I found that Mars's location near the lunar node on both sides of the chart shows up around the time of escalating rocket fire. Here is what I mean:

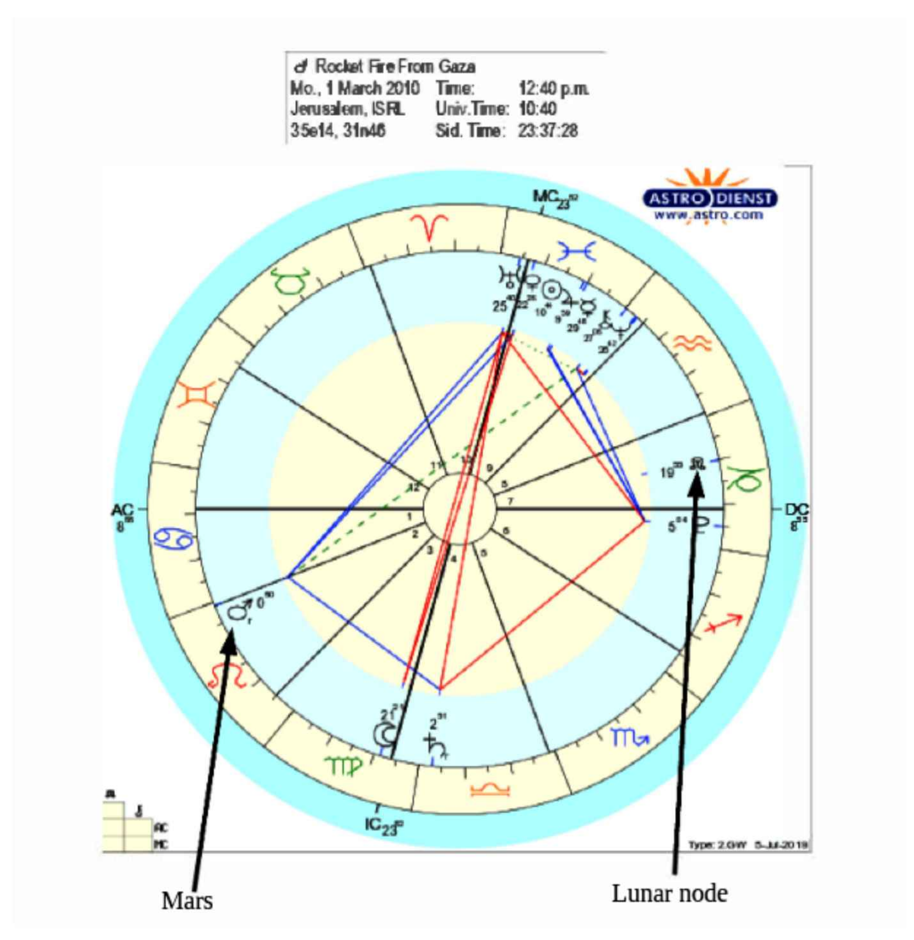

Mars is falling somewhere within a 30 degree vicinity of the lunar nodes on either side of the astrochart during the time to rocket fire escalation from Gaza. If we go back to "Figure H" and look at the rocket attacks for 2007, we can see that most of the rocket fire for that year took place in May. There were 257 rockets fired from Gaza during that month. If we look at the astrochart for May 2007, we can see that Mars is close to the lunar node.

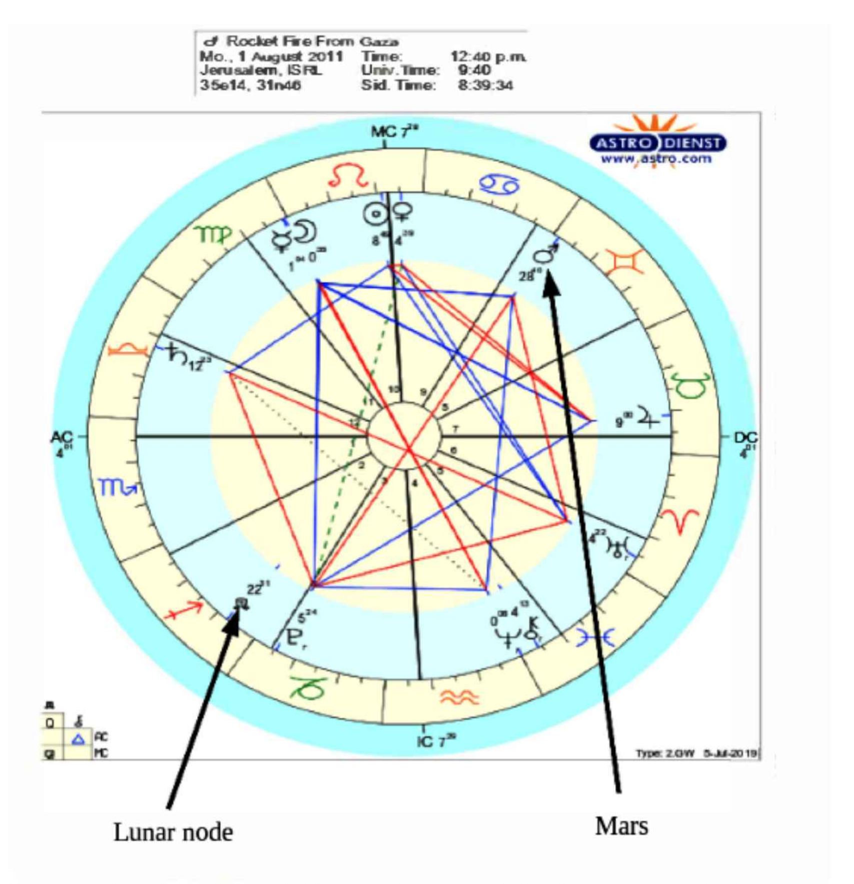

We can see Mars within close range of the lunar node in this Chart calculated for May 2007. If we go back to "Figure H" and look at late 2008/early 2009 when the Gaza War(also knows as Operation Cast Lead) took place, we'll find that once again Mars is in the vicinity of the lunar node. It gets to within 30 degrees of it in early January. See the next page.

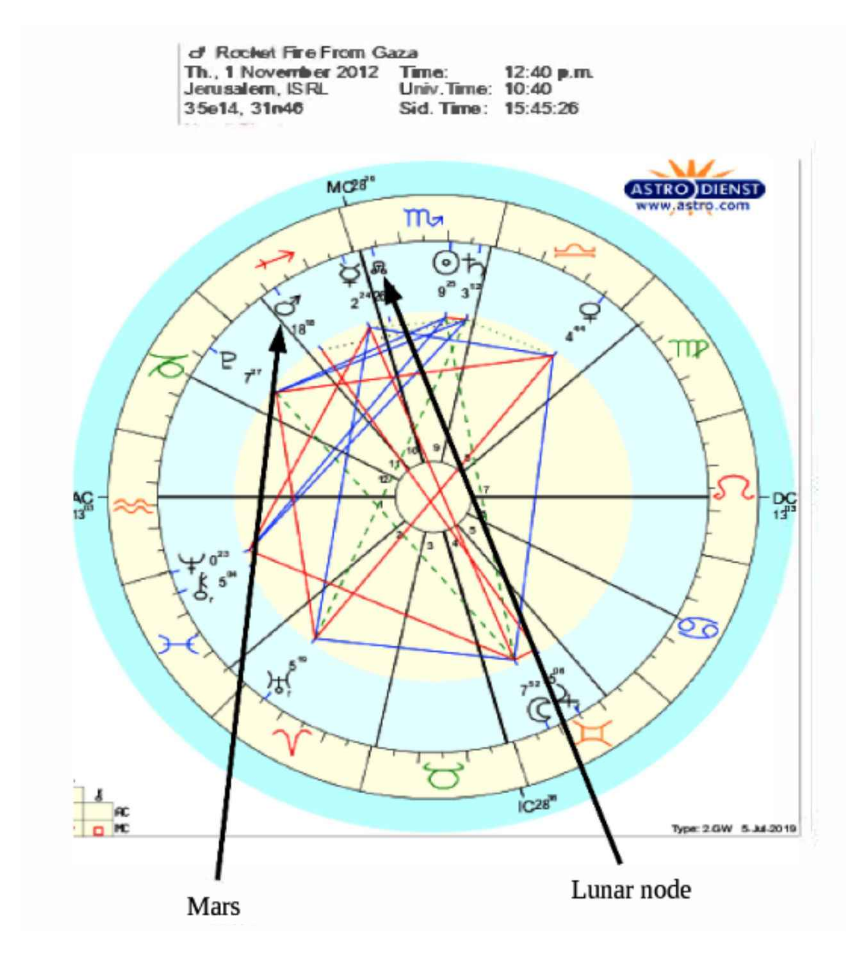

Here, on January 8th, 2009, Mars gets within 30 degrees of the lunar node. We can see in Figure H that the rocket fire doesn't really settle down until March 2009. Between January 8th and January 17th, Gaza militants fired over 100 rockets into Israel. Mars finished within 30 degrees of the lunar node on March 24, 2009. This would align with Mars producing an effect while being near the lunar node during that timeframe. If we go back to Figure H and look at the year 2010, we notice that the highest concentration of rocket fire took place during the month of March. During that time, 35 rocket attacks took place. Here is the astrochart for March 2010.

Once again, same thing, but this time Mars in on the opposite side of the lunar node, but within 30 degrees. This still aligns with Mars on either side(near conjunction or near opposition) of the lunar node being a factor in rocket attacks from Gaza. If we go back to Figure H and look at the year 2011, we find that most of the rocket attacks that year took place in August. There were 145 rockets fired from Gaza into Israel territory. Lets look at the astrochart for August of 2011 and see if Mars falls within 30 degrees of the lunar node.

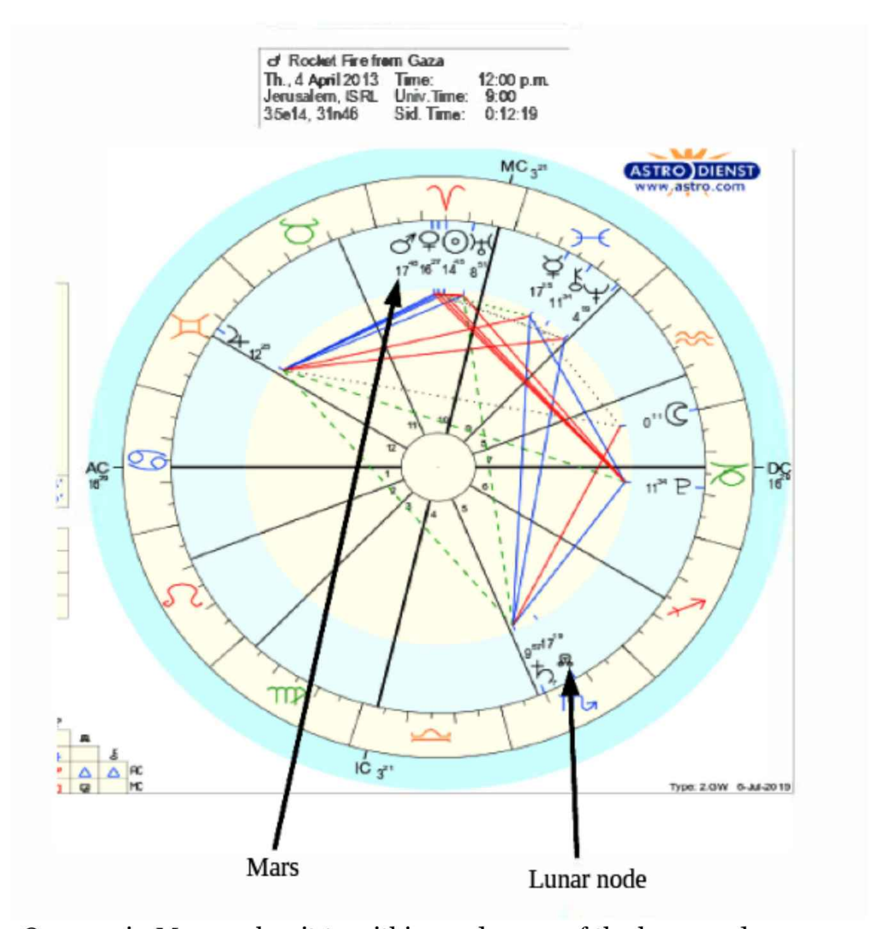

Once again Mars falls within 30 degrees of the lunar node during a month where the highest level of rocket fire for the year was concentrated. If we go back to Figure H and look at the next year, which would be 2012, we find that the highest level of rocket fire took place in the month of November, in which there was 1734 rockets fired from Gaza into Israel. That's a significant spike in rocket fire. If we pull up the astrochart for November of 2012(see next page), we can see Mars is once again within a 30 degree vicinity of the lunar node.

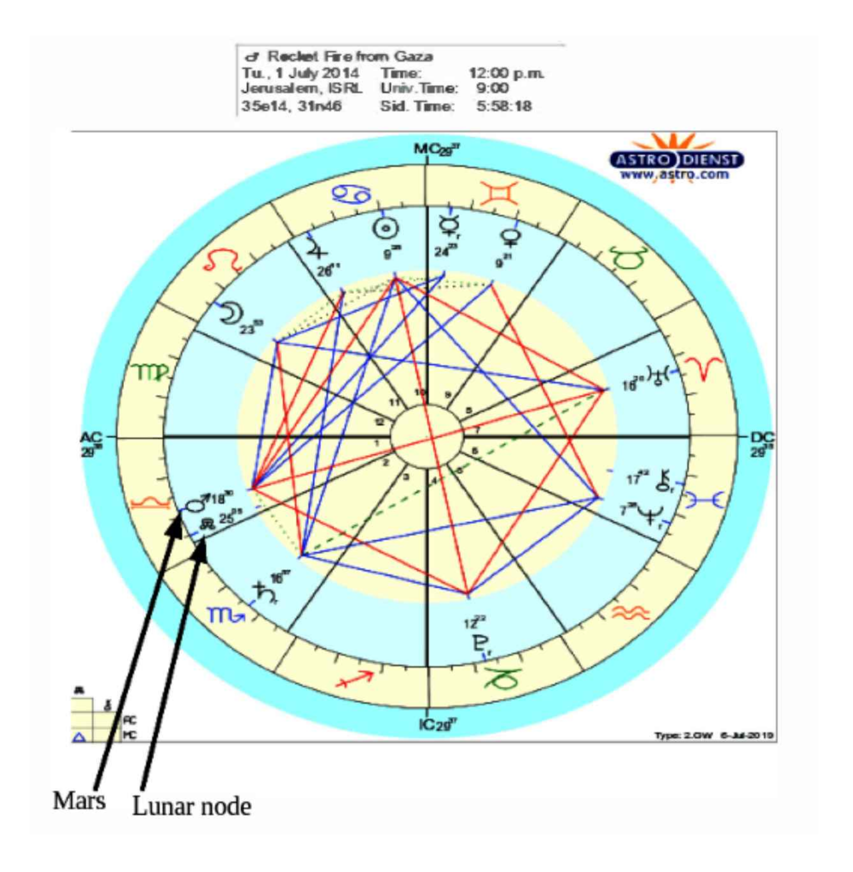

Mars is clearly within 30 degrees of the lunar node during a significant rise in rocket attacks against Israel in November of 2012. If we go back to Figure H and look at 2013, we find that the highest concentration of rocket fire from Gaza that year took place in April, which is also the month that the Boston Marathon Bombing took place in the US. In April, there were 17 rockets fired from Gaza.

Here is the astrochart for April 2013.(next page)

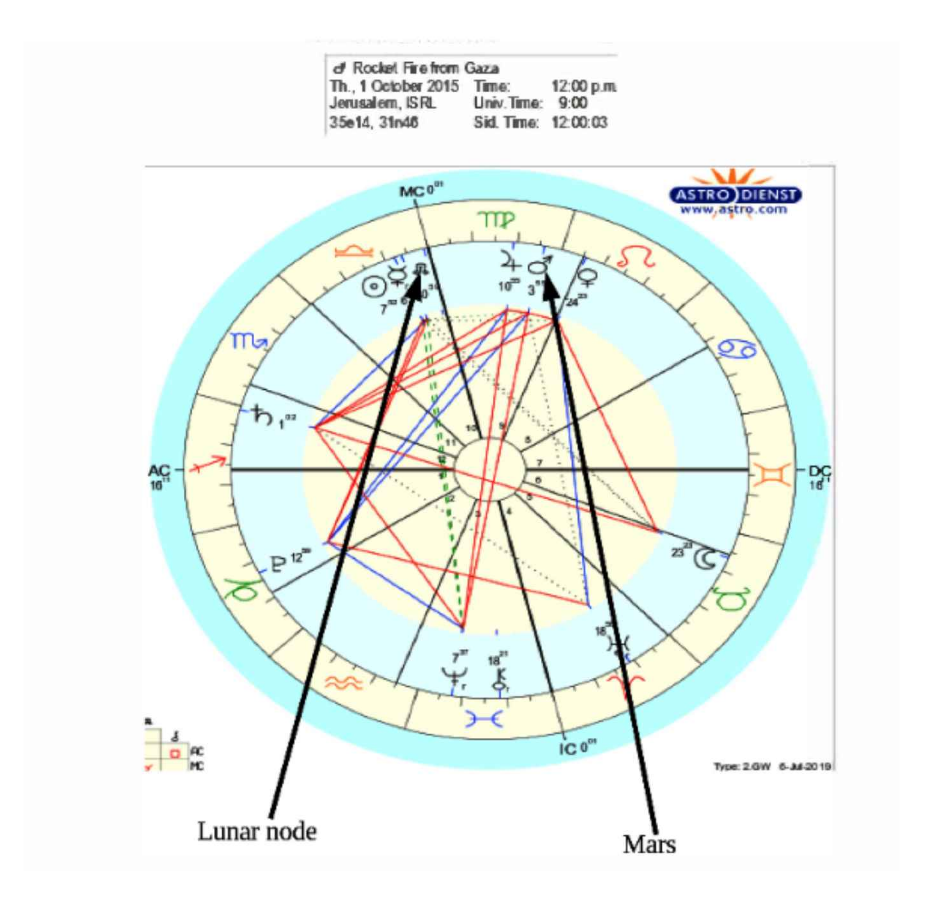

Once again Mars makes it to within 30 degrees of the lunar node, on the exact opposite side. As stated before the both sides of the chart are the same. Now in going back to Figure H, we can have a look at 2014 and see which month had the highest concentration of rocket fire that year.

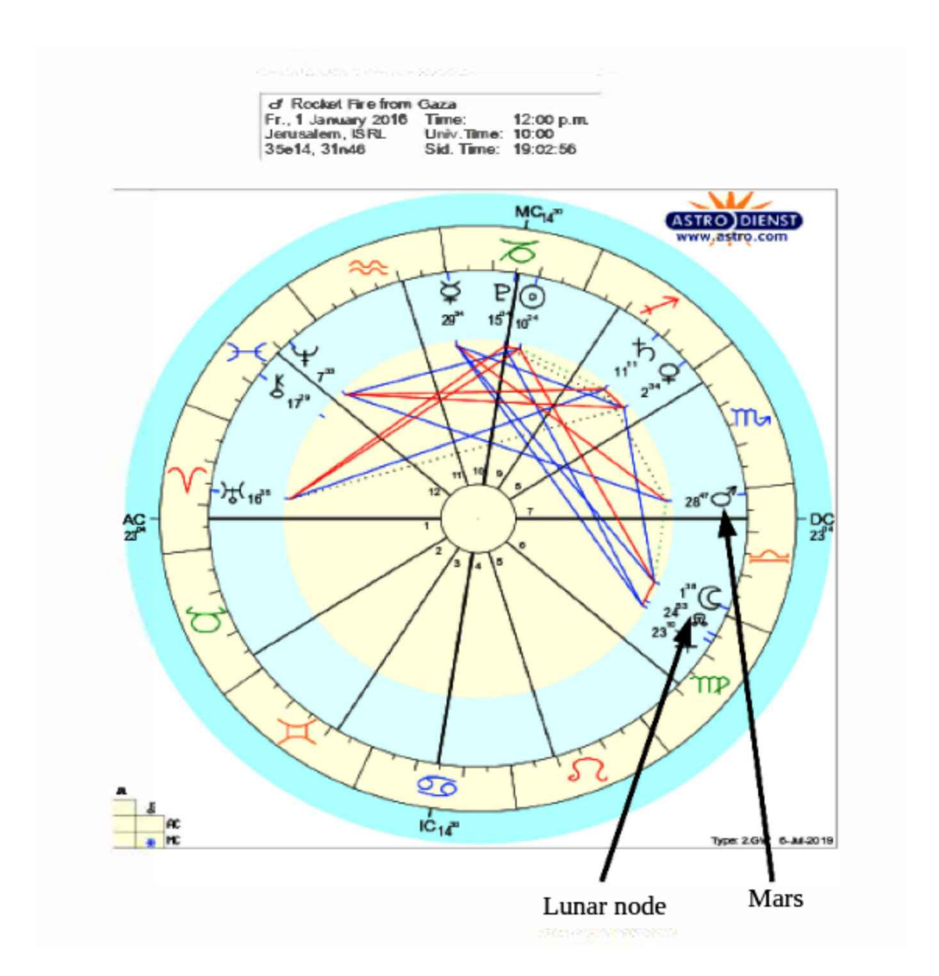

We can see in 2014, the month of July had an extreme spike in rocket fire with 2874 rockets being fired from Gaza into Israel. Here is the chart for July 2014 on the next page:

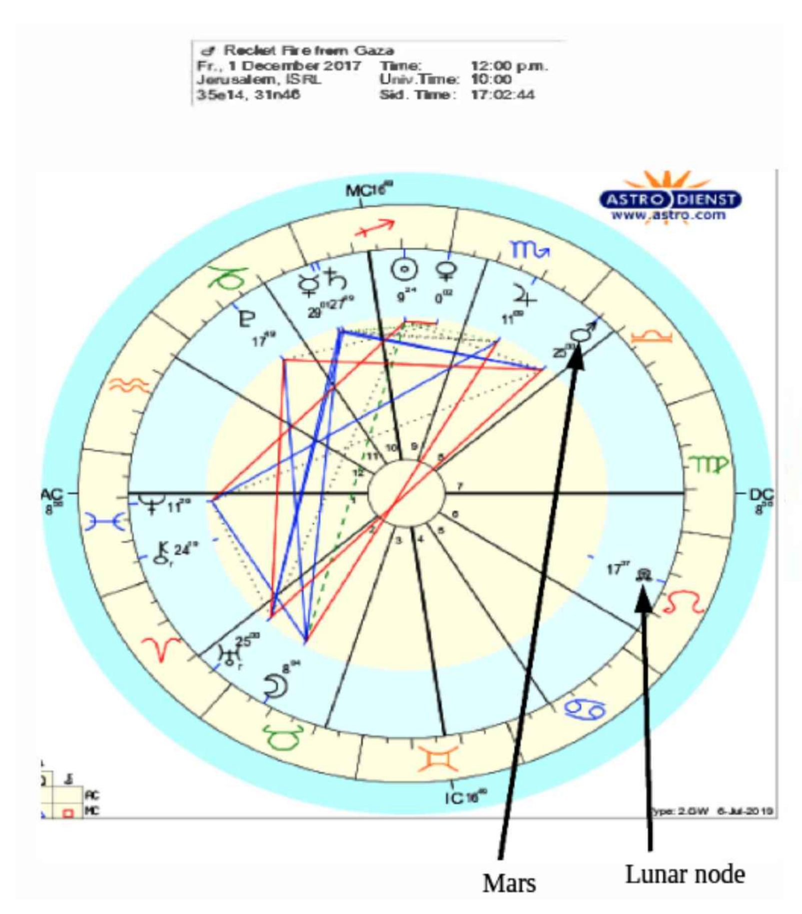

Once again, Mars is within 30 degrees of the lunar node, this time on the same side. Lets go back to Figure H and look at 2015 to see which month had the highest concentration of rocket fire from Gaza. 2015 doesn't seem to have much activity in terms of rocket attacks from Gaza. However, if we go ahead and observe anyway, we find that October turns out to be the month where the highest level of rocket attacks took place for 2015. Here is the chart for October 2015:

There it is again. Mars in within 30 degrees of the lunar node during a month of rocket fire escalation from Gaza. If we go back to Figure H to see which month had the highest concentration of rocket fire from Gaza in 2016, we find January to be the month where most of the activity took place. See the chart on the next page

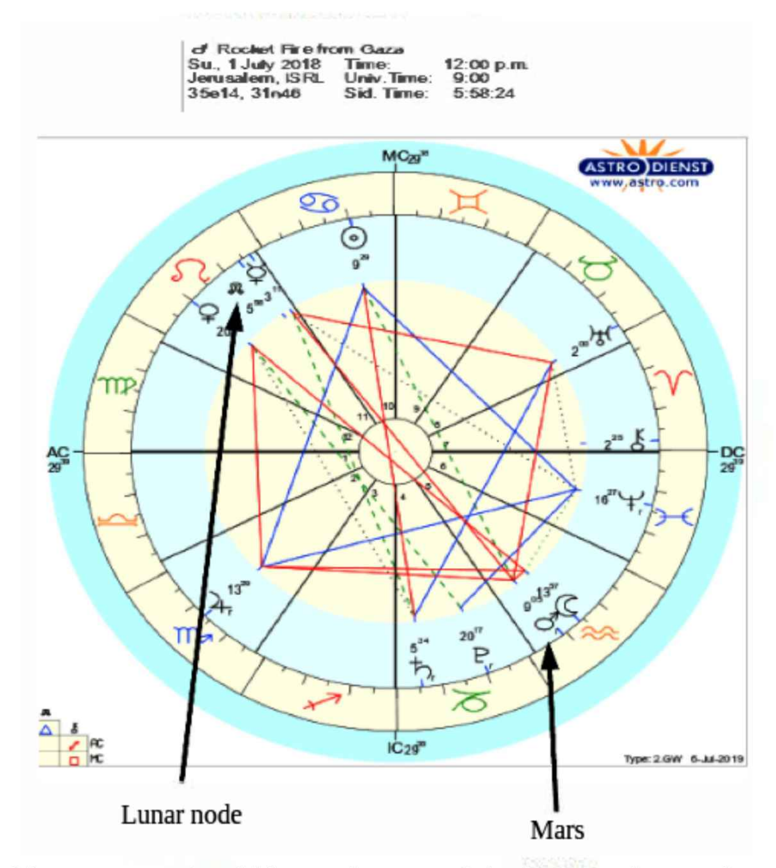

In January of 2016, Mars is just leaving from within 30 degrees of the lunar node. 2016, however, did not bear much significance in terms of violent conflict. In Figure H, the concentration of rocket fire in 2017 took place in December. 28 rocket were fired from Gaza during that month. See the chart on the next page.

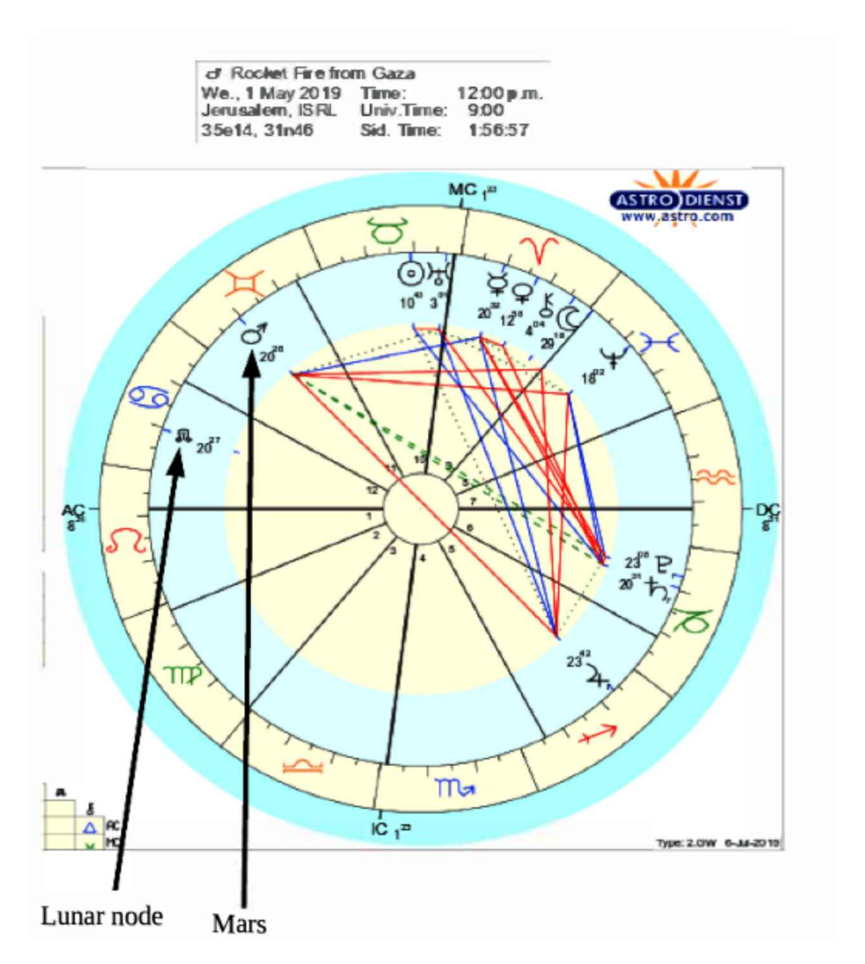

Mars is well out of range of being with 30 degrees of the lunar node, so one cannot say that the escalation in December of 2017 was related Mars. Mars would have last been within 30 degrees of the lunar node back in August of 2017, but there was only 1 rocket attack that month.

Lets go back to Figure H and have a look at 2018. We find that the month that had the greatest amount of rocket fire from Gaza that year was July. There were 174 rockets fired into Israel from Gaza during that time. See the astro chart on the next page

In this one, Mars is within 30 degrees of the lunar node, on the opposite side. So once again, that position of Mars has showed up during a month of escalation. In going back to Figure H for 2019, we see that May is the month with the highest concentration of Rocket Fire that year. There were 600 rockets fired from Gaza into Israel. Let see if the astro chart on the next page continues to show a correlation between Mars being within 30 degrees of the lunar node and escalating rocket fire from Gaza.

Once again, Mars is within 30 degrees of the lunar node during a month of escalating rocket fire. May 4, 2019 was the day that the rocket attacks were launched from Gaza. In this chart of May 1, we see Mars just entering within that 30 degrees from the lunar node.

One can say, after reviewing this, that there is a statistical significance regarding the correlation between escalating hostility from Gaza toward Israel and Mars being within 30 degrees of the lunar node.

Here are the remaining dates thru the year 2027 when Mars is within 30 degrees of the lunar node. Here you can review the past dates of Mars within 30 degrees of the lunar node and compare them to actual rocket fire statistics firsthand.

June 5, 2025 - Sept 4, 2025
Feb 4, 2026 - April 19, 2026
Sept. 27, 2026 - June 12, 2027

For four consecutive years, following the info that I laid out on Gaza rocket fire, I further affirmed the thesis by predicting in real time the time-frame that an increased number of Gaza rockets would be fired into Israel relative to the rest of the year, all by observing the position of the planet Mars. Gaza militants are influenced by this planet, the ancient god of war. The same god of war that backed the Romans when they sacked the temple in AD 70.

Those future dates of Mars being within 30 degrees of the lunar node were set back in 2019 in Ares Le Mandat. Here is the earliest source. Go to the end of chapter 24 to see the list of dates for expected increased rocket fire relative to the rest of the year
https://archive.org/details/areslemandat_20191110/page/n349/mode/2up

Here is proof that the PDF is from November of 2019
https://archive.org/download/areslemandat_20191110

Not only did I show how historical data of rocket fire from Gaza into Israel going back to 2007 aligned with Mars and the lunar node, I also demonstrated this pattern in real time in 2020, 2021, 2022, and 2023 by making YouTube videos predicting escalated Gaza rocket fire relative to the rest of the year. Here is proof.

Here is the first demonstration of the thesis that says that the time-frame of when Mars is within 30 degrees of the lunar node is the time when rocket fire from Gaza into Israel will be highest compared to the rest of the year. This was the case in 2020, when I predicted that rocket fire between January 15, 2020 and April 3rd 2020 would exceed rocket fire during other months in 2020. This is confirmed. Gaza militants fired 104 rockets in February of 2020(highest relative to rest of the year) This video was made on November 18 2019(see transcript below)
https://www.youtube.com/watch?v=e5GxO4ZW2fc

Here is the transcript of the video

Hi this is Anthony. I want to do a follow up video. In the last video, I describe the lawless one as Mars 360 and i explained how I came to that conclusion. I used the English Sumerian gematria. So using that system, I was able to take the word Mars and add up the numerical value of each letter and get the number 306. I simply added 360 to 306 and that's how i got 666. So that's how I was able to link Mars 360 with 666. Mars 360 is the revolution of Mars around the sun and its influence on humanity. The difference between the way I describe it and the way contemporary astrology describes Mars has to do with energy. In contemporary astrology, the location of Mars at the time a person was born and what describes that location is the area of life where the person would infuse alot of energy and effort towards. The way I describe Mars, which is sort of opposite the way contemporary astrology describes it, has to do with the fact that Mars is actually the opposite. Mars is pulling energy away from the location of where it was at the time you were born and the description of that location or the area of life that describes that location. But for this video, i don't want to get into how Mars affects each human at the individual level. I want to talk about how Mars influences events and in chapter 24[of Ares le Mandat], you will notice I have information regarding the Israel/Palestinian issue in the middle east. In my research of rocket fire from Gaza into Israel, I noticed when looking at the statistics-in terms of month to month- the level of rocket fire from Gaza into Israel seems to correlate with the position of the planet Mars in relation to the lunar node. I noticed that the month where rocket fire from Gaza was highest compared to the rest of the year, that's the month where Mars was within 30 degrees of the lunar node and the statistics in chapter 24 go back to 2007 and the correlation is pretty significant. I think there might have been one year that finding didn't apply, but overall the results seem pretty significant and I want to use this video to extrapolate from that information when rocket fire may escalate again in Israel and rocket fire from Gaza towards Israel. So if we take

the data from chapter 24[of Ares le Mandat and apply it to the future, Mars is within 30 degrees of the lunar node January 15 2020 all the way until April 3rd 2020. So during that time-frame, we can expect serious escalation of rocket fire from Gaza into Israel and the concentration of rocket fire during that time will exceed the amount of rocket fire at any other time during that year. So I just wanted to bring attention to that chapter. Its chapter 24. Its called Military Engineering Mandate and the statistics of rocket fire was taken from the internet, mostly from Wikipedia and the information there is very, its very interesting and I think if you take a look at it, you will find it quite profound that the correlation was this significant and I think its....I don't want to say that its fitting that it would apply to whats happening in the middle east, but I have concluded that Mars 360 is not only the Christian Antichrist, its also the Islamic Antichrist. the Antichrist equivalent in Islamic eschatology is called the Dajjal and Mars 360 applies to descriptions of Antichrist in Christian theology but it also can apply to description of the Dajjal in Islamic eschatology. so that's the information I wanted to put forth for this video. Thank you. .....end

Here is proof that the prediction was accurate. Here are the Gaza rocket stats. See 2020

Feb 4, 2026 - April 19, 2026
Sept. 27, 2026 - June 12, 2027

It also happened again in 2021 when on record on video, I predicted that rocket fire from Gaza into Israel between February 9, 2021 to May 13, 2021 would exceed rocket fire in the other months in 2021. Once again confirmed. Gaza militants fired 4000 rockets beginning on May 10th(highest relative to other months) This video and real time prediction was actually made on May 7th 2020 https://www.youtube.com/watch?v=v1sA-ZS73Lw&t

Here is the transcript

I want to give the remaining dates from now until the year 2027, 'when Mars will be within 30 degrees of the lunar node—and subsequently when there would be an increase in the tensions between Israel and Gaza, resulting in an escalated rocket fire from Gaza into Israel. So here are the dates from now until 2027. We just finished the previous phase in which I predicted that there would be an escalation of rocket fire from Gaza into Israel due to the influence of Mars being within 30 degrees of the lunar node. Mars was within 30 degrees of the lunar node between January 15th 2020 to April 3rd 2020. It will go within 30 degrees of the lunar node again on February 9th 2021 and last until May 13th 2021. After that the next phase of Mars being within 30 degrees of lunar node will be from November 4th 2021 to January 22nd 2022. After that will be June 22 2022 to September 19th 2022. Then December 26 2022 to January 24th 2023. August 24th 2023 to November 15 2023. April 12 2024 to June 25th 2024. June 5th 2025 through September 4th 2025. February 4th 2026 to April 19th 2026. lastly September 27 2026 to June 12th 2027 So after having completed this first phase in which I was able to predict by simply observing the position of Mars in relation to the node and having now having demonstrated an ability to forecast this year the escalation that took place between January 15th and April 3rd, I think

it would be prudent for us to try and understand what this Mars phenomenon means in a religious sense. Now, this isn't done to draw discord between the Israelis and the Palestinians. The reason all of this is being presented is to try and present a new perspective right now. The perspective is that God or Yahweh or Allah is "everything." So what I'm trying to do is present the perspective that it's necessary for us to not focus so much on the God of Abraham Isaac and Jacob, but... look over ..... to the look over somewhere else..... look over..." let's have a look....... let's see what Mars is doing. You know one can see historically, the correlation between the planet, Mars and the geopolitical events in Israel. One can see. how that would mean that it deserves more attention. In AD 70, when the Jewish people were driven out of Israel by the Roman army...... essentially the God of Abraham, Isaac and Jacob went head to head with the god of the Roman Empire, the military god of the Roman Empire, which was Mars. And judging from the outcome, it was Mars who was successful. Now that's something that makes a case for the power of this Mars phenomenon Another example is how later on during the Roman Empire, the emperor had made Christianity an accepted religion of the Roman Empire. It was precipitated ..... it precipitated the eventual fall of the Roman Empire. In the book "City of God" Saint Augustine addresses a lot of the arguments made by some of the opponents of Christianity that the Roman Empire would still be in place had they not abandoned the old polytheistic outlook—the worship of multiple gods; the worship of Mars as a protective military force for the Roman Empire. If one wants to argue that if the Roman Empire remained with the polytheistic perspective, the perspective in which the Roman army worshiped a designated god "Mars" as the god of war, one can conclude that the Roman Empire could still be intact today. In "City of God" Saint Augustine dealt with a lot of backlash from opponents of Christianity that felt the reason that the Roman Empire fell was because they abandoned the old gods, they abandoned Mars as the protective military force of the Roman Empire. And this is a pretty strong case. It would be all the more advantageous if Christians, Jews and Muslims could spend...-. could take some of that time that they use giving attention, giving reverence to the God of Abraham, Isaac, and Jacob and bring it ....bring it over to Mars, the traditional god of war for the Roman Empire. Now, in the link below I'm going to leave some information regarding how Mars affects the US stock market. I have data going back to 1896 that shows how the Dow Jones performed when Mars was within 30 degrees of the node. Overall. it presents... Overall, it seems to indicate that the Dow Jones performs better when Mars is not within 30 degrees of the lunar node. I'll leave

the link at the bottom so that you can view and study this data yourselves but for now as it stands the next time that we can expect another increase in hostilities in Israel particularly as it pertains to the amount of rocket fire from Gaza. The next time we can expect that increase is between February 9, 2021 and May 13, 2021 when Mars will be within 30 degrees of the lunar node....The end

This prediction was also accurate. Here are the stats. See the year 2021

Sept 27, 2026 - June 12, 2027

Here is where I predicted well in advance on May 27, 2022 that Gaza militants would fire an increased number of rockets at Israel between June 22, 2022 and Sept 19, 2022. At the moment, it stands that Gaza militants fired 1000 rockets between August 5th and August 7th of 2022. https://www.youtube.com/watch?v=6EniwV0TWew

Here is the transcript

Hi, this is Anthony, I am making this video because I want to do another prediction concerning whats going on in Israel. You will notice if you look at my last videos, that I was able to make pretty accurate predictions concerning the timeframe of the highest amount of rocket fire from Gaza into Israel relative to the rest of the year. In one of my older videos back in 2020 during the pandemic, I was able to predict that the number of rockets from Gaza into Israel between January 15, 2020 and April 3rd 2020 would exceed the number of rockets fired at any other point during the year and that turned to be the case. I did the same the next year and...well I mean it wasn't the next year....that same year in 2020, I made another prediction for the next year and that prediction, I stated that the number of rockets fired from Gaza into Israel during the year 2021 would be highest during the timeframe between February 9th 2021 and May 13th 2021. And that certainly was accurate because that's the year the Gaza war took place when militants in Gaza over thousands of rockets into Israel starting around may 10 or may 11th just two days before the [end of the]designated timeframe of which it was predicted that the number of rockets fired during that time would exceed the amount fired for the rest of the year 2021. So thats 2 years in a row that I made accurate predictions simply by observing when Mars would be within 30 degrees of the lunar node. So now we're in 2022 and if we look at where Mars is gonna be situated in relation to the lunar node, we can see that between June 22, 2022 and September 19, 2022, Mars will be within 30 degrees of the lunar node and really the main gist of this thesis is that Mars, not just as a god of war that was worshiped during the time of the Roman empire, but as a planetary influence, it still has

an effect on things happening on earth today, and in particular whats happening with Israel. Back in AD 70, the Romans basically used Mars to go into Israel and destroy the temple and today based on my thesis, Mars is still trying to exert an effect on the enemies of Israel in order to destroy the state of Israel. This influence is not going anywhere. So this year, I am going to make another prediction about....we already know the thesis I... the thesis is that when Mars is within 30 degrees of the lunar node, militants in Gaza will fire an increased number of rockets or in engage an escalated warfare against the state of Israel during that time compared to the rest of the year. I made this clear in my other videos that this would be the case when it comes to Mars being within that 30 degrees of the lunar node. So this year, I am going to make another prediction. We are already late in 2022, but still I just want to reinforce the basic thesis here. So we can expect that the number of rockets fire this year between June 22, 2022 to September 19 2022 will exceed the amount of rockets fired by Gaza militants into Israel for the rest of the year. So, the whole point of this is to try and get Israel to become of this Mars influence and the negative impact that its had on Israel throughout history and the reason that I asked in another video for Israel to try and make an image to...to make some sort of an image to this Mars force, is largely built around the concept that we can sort of extrapolate from the Book of Numbers when Moses told the Israelites to make an image to a bronze serpent in order to keep serpents from biting and killing them as they wandered through the desert. So this request that Israel make an image is built around that same framework that if they just make an image to this Mars influence, it'll somehow be a solution to the problem of Mars influencing militants in Gaza to scale up, dial up attacks against civilians in Israel which would ultimately provoke or escalate the entire conflict to where Israel ends up going into Gaza launching airstrikes, conducting military operations that endanger and kills many civilians in Gaza. And vice versa, the militants end up firing more and more rockets directly at Israeli civilians which imperils and kills Israeli civilians. So its important that Israel try and give this whole Mars thesis a look. It may be something can lead to a non-violent solution to this on-going war in Israel. So as it stands for the year 2022, the number of rockets fired by Gaza militants and this is due to the influence of Mars the god of war the same god of war that influenced the Romans to go into Israel and destroy the temple. So we can expect because of this influence, Mars will influence the Gaza militants to dial up the number of rockets fired between June 22, 2022 and September 19 2022, relative to the rest of the year. So with the war in Ukraine happening right now and then of course, there has

been some tensions in early 2022..there has been some recent tension just prior to this time frame that I am giving. So it is easy to expect that things will dial up between that time frame of June 22, 2022 and September 19, 2022 relative to the rest of the year and of course you can go back to my old videos and see that I made these predictions accurately in 2020 and 2021, so I am expecting this sort of prediction of basically predicting fire coming down from heaven will pan out accordingly in 2022. So there it is I hope the state of Israel can really look into this and see what they can do to keep this god of war, Mars, from taking every every measure to influence people against the state of Israel, Israelis because this seems to be an ongoing thing, As I said before this was the case in AD 70 and its not just the Romans. Mars as a god of war can be said to be an amalgamation of all the gods of war that ever existed. The Babylonians conquered Israel, They came in with a god of war and so did the Persians. The Greeks as well, they has Ares. And Israel stuck with the God of Abraham whom historically has not been very successful in deterring this god of war aspect from coming in and running the Jewish people out of their land and we can see that Mars is really making an effort to get the militants in gaza to at some point to eventually Israeli off their land. And, ya know, for Muslims who don't really know what to make of this sort of Mars thesis. Basically the best way to understand it. Mars is the source of what Islamic discourse would consider the jinn. Whats happening in Gaza is that when Mars goes within 30 degrees of the lunar node seems to be releasing the jinn directly into Gaza militants which is sort of compelling them to upscale their attacks on the state of Israel specifically during that time frame compared to other times during the year. Just keep in mind for this year the time between June 22, 2022 and September 19 2022 when Mars goes within 30 degrees of the lunar node, an increase in the amount of rocket fire will occur between time compared to other times or other months during the year 2022. Thank you...end

Here is proof that the prediction was correct. See stats for the year 2022

Here is where I predicted well in advance on January 25th 2023 that Gaza militants would fire an increased number of rockets at Israel between August 24, 2023 and November 15, 2023. At the moment, it stands that Gaza militants fired 5000+ rockets during this time frame. https://www.youtube.com/watch?v=IGbNPEO9qS4

Here is the transcript

All right this is Anthony, so three consecutive years I've been able to predict exactly when Gaza militants would fire more rockets at Israel relative to the rest of the year. So back in 2019 using the observation of Mars, I was able to predict in 2020 that Gaza militants would fire more of their rockets during the time frame of Mars being within 30 degrees of the lunar node. In 2020, Mars was within 30 degrees of the lunar node between January 15th and April 3rd and looking back we can see that it happened exactly as predicted. In between January 15th and April 3rd, Gaza militants fired roughly 112 rockets at the state of Israel during that time, and that amount exceeded the amount of rockets fired during any other month during the year. So it went exactly as predicted. I was able to know in advance exactly when Gaza militants would fire their highest amount of rockets for that year simply by observing when Mars would be within 30 degrees [of the lunar node]. In that same year I predicted exactly how Gaza militants would fire rockets in the year 2021. So in 2020, I made a video predicting that Gaza militants would fire more rockets in 2021 when Mars would be within 30 degrees of the lunar node between February and and May and looking back at the year 2021, that's exactly what happened. During that time, Gaza militants fired roughly....they

fired.... during that time, Gaza militants fired over 4000 rockets at the state of Israel. So that's the second year that...So that was the second year in a row I got that prediction correct. In 2022 same thing. you can look back at my previous video where I was able to predict that Gaza militants would fire more rockets when Mars would be within 30 degrees of the lunar node between June 22nd 2022 and September 19th 2022. And looking back, that's exactly what happened. In early August 2022, Gaza militants fired 1100 rockets at the state of Israel. So now I'm.....So that's the evidence is right there. You can look back at my previous videos and see that I was accurate for three consecutive years in in 2020, in 2021, and 2022. By observing when Mars would be within 30 degrees of the lunar node, I was able to know in advance when Gaza militants would fire more rockets at the state of Israel relative to the rest of the year. So for this video I'm going to predict when Gaza militants are going to fire most of their rockets in the year 2023. So, in 2023, Mars will go within 30 degrees of the lunar node between August 24th 2023 and November 15 2023. So between that time we can we can expect Gaza militants will fire more of their rockets at the state of Israel than at any other time during the year. So between August 24th 2023 and November 15 2023, expect the highest amount of Rocket fire from Gaza to occur.....expect the highest amount of Rocket fire from Gaza for the year 2023 to occur between that time of August 24th and November 15th. So I'm gonna make the prediction, I'm going to....I'm gonna confirm the prediction right here for the year 2023. Most of the rockets that will be fired from Gaza....that will be fired by Gaza militants at the state of Israel, will be fired between August 24th 2023 and November 15th 2023. So for the year 2023, we can expect the highest amount of Rocket fire from Gaza into Israel to take place between August 24th 2023 and November 15th 2023 when Mars will be within 30 degrees of the lunar node. This will be the fourth year in a row that this prediction is made. So in 2020 you saw it...you saw it......you can see the video from 2019 when I called down fire from heaven....when I called that Gaza militants would fire more rockets at the state of Israel between January 15 2020 and April 3rd 2020, and the amount they fired between that time will be more than the rockets they would fire at any other point during the year.... and that turned out to be exactly what happened. I made that prediction in 2019, and it transpired exactly as I predicted in 2020. And later in 2020 I made a prediction for 2021....that in the year 2021 Gaza militants would fire more rockets relative to the rest of the year between February 9 2021 and May 13 2021, and looking back, we can see during that time, that's when the Gaza War took place. Gaza militants fired over 4000 rockets

at the state of Israel when Mars was within 30 degrees of the lunar node. Fast forward to the next year 2022, I did the same exact thing. You can see the video. Look back at my video when I....when I got on video and I said months before it actually happened that Gaza militants would fire more rockets......when I got on video and said that the highest amount of Rocket fire from Gaza into Israel would take place when Mars would be within 30 degrees of the Lunar node between June 22nd 2022 and September 19 2022 and looking back we can see that's exactly what happened. Early August, Gaza militants fired 1100 rockets at the state of Israel during that time, and now I'm doing this again in the year 2023. Gaza militants will fire more of their rockets between August 24th 2023 and November 15 2023. Between that time, the highest amount of rockets fired from Gaza into Israel will exceed the amount of rockets fired during any other month in the year 2023. So that's the prediction. I'm calling down fire from heaven for the fourth year in a row. Thank you

This prediction was correct Here are the stats. See year 2023

After demostrating accurate predictions of rocket fire from Gaza since 2019, Anthony has made numerous requests for an image to be made to the god of war.

Here on April 4th 2020, I advised the state of Israel should build an image to Mars/Ares in order to tame its influence. Same concept as the building of the bronze serpent on the book of Numbers https://www.youtube.com/watch? v=wwsGqQK7OV4&t

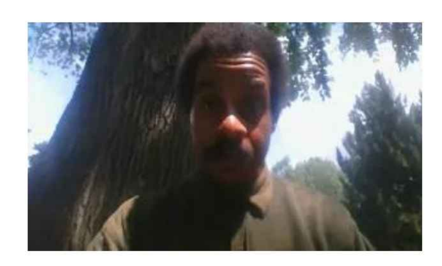

Here is the transcript

This is Anthony. This is a follow-up video to the one made back in November in which I was observing Mars and correlating it with the 666 referred to in the Book of Revelation. Back in November and an observation of Mars I was able to make a prediction and the prediction had to do with escalation events in Israel. When Mars goes within 30 degrees of the lunar node-historically-there seems to be a correlation between that and the number of rockets fired into Israel from Gaza. So in the last video, I had gave the dates in which Mars would be within 30 degrees of the lunar node. Those dates were between January 15th 2020 and April 3rd 2020. Today is April 4th. So that phase has pretty much ended and looking back, we can see that starting on January 15th--as according to the prediction--there was a rise starting on January 15th. There was an increase in the amount of rockets fired from Gaza into Israel. From January 15 to the end of the month, there were about eight rockets fired. In the month of February, there were about 104 rockets fired. In March, there was 1 and that was it. So during that time, February was the month where there was the highest amount of rockets fired from Gaza into Israel. The amount of rocket fire that takes place during the months when Mars is within 30 degrees of the lunar node will exceed the amount of rocket fire for any other month during the year. So with this recent phase from January 15th 2020 to April 3rd 2020, the total number of rockets fired was around 113... with the majority of them being fired during the month of February. So according to what I've been presenting, the amount of rocket fire that would take place for the rest of the year will not exceed the amount of rocket fire that took place during this Mars-within-30-degrees-of-the-lunar-node phase. So with February having about 104 rockets fired, we can expect that there won't be another month of this

year that would exceed the number of rockets fired in February. Why? Because Mars won't be within 30 degrees of the lunar node at any other point during the year. So it won't be until the end of the year where it would be affirmed that Mars within 30 degrees of the lunar node was responsible for the escalation in Israel. But in the meantime, I think it's important that we start paying some attention to this energy, this force that seems to be responsible for a lot of tension or a lot of violence here on earth. Even though according to monotheism, there's this notion that there's just one god, but if there's all these forces here on earth affecting how we live as as human beings then we have a right to take responsibility and observe and prevent this energy or deal with this energy in a way... to where...or deal with this force in a way to where it doesn't destroy us. So with that being said, in the meantime since this recent phase has ended, the people of earth should think about getting in touch with this energy... this Mars energy that's responsible for a lot of the problems we have on this planet as far as war, as far as violence, as far as tension. What I'm asking or what I'm requesting is that if we can start the process of getting in touch with this energy in a way that even though we know it's going to be here, we can somehow figure out a way to keep it from destroying us. I'm proposing that we we follow the same model that Moses used in the book of Numbers when he led the Israelites out of Egypt and when they were wandering in the wilderness for 40 years, they had reached a point where they were being attacked by these fiery serpents. These fiery serpents would attack them, bite them, and kill them...and the Israelites asked Moses to intercede on their behalf and ask God for a solution to this problem --to make it stop. And as Moses did do just that, he interceded. He came back to the Israelites with the solution, and he told them.... he ordered them to make an image.... to create an image of a bronze serpent and the next time all these fiery serpents would end up biting them, they could just stare at the image--not worship it--but they could just stare at the image, and if they did that, they would be immediately healed. Well I'm trying to follow.. or what I'm proposing is pretty much the same model. That if we make an image.... somehow form an image to this Mars force that seems to be affecting us here on earth, that it will somehow mitigate the problems associated with its influence. So when we look at not just Mars, but all the gods of war...Ares notably.... Ares was a god who was wounded and healed. He was wounded in battle and he was later healed and because of that, I think it would be appropriate to start coming up with some sort of plan to make an image... build an image to Ares... a representation of Ares to the Greek god of war who was wounded and was healed. Ares and Mars is essentially..... they're

essentially the same thing. Ares is the Greek version of the god of war and Mars is the roman version. So we're looking at both. We're observing both as the same. We're observing the planet Mars and in terms of making an image or building a tribute, we use Ares, the Greek version of Mars. So I think it would be a good plan to start coming up with some sort of way we can follow that same model that Moses and the Israelites followed when (they were being attacked by the fiery serpents and solving that problem by actually building an image to the serpent.... building a bronze serpent and then just staring at it as they were bitten and as they stared at it they wouldn't they were somehow healed).... So this...sort of.... this follows along that same line. We are going along that same... or.... following that same path where we are affected by war... war is affecting us.... so in order to keep it from affecting us in a negative way, we're presenting something.... an image of it here on earth, and we're simply staring at it as a way or as a plan to keep this force from breaking us-destroying us. Now if there isn't any human intervention as far as this Mars phenomenon goes, then I should give the upcoming dates for when Mars would be within 30 degrees of the lunar node: February 9th 2021 to May 13 2021, November 4th 2021 to January 22nd 2022, June 22nd 2022 to September 19th 2022......end

Here is the video made on August 8th 2022 where I introduce the Armaaruss as the image that should be built under the same concept as the bronze serpent mentioned in the Book of Numbers. In the video, I also advise that the Mars 360 system and the astrological marking system be applied to commerce(buying and selling).

Here is the transcript

Hi, this is Anthony again. I once again was able to prophecy when an increased level of rocket fire from Gaza into Israel would take place. We are currently in the phase of Mars being within 30 degrees of the lunar node between June 22, 2022 and September 19th 2022. And between August 5 and August 7th, militants in Gaza have already fired over 1000 rockets into Israel. The last video I made predicted this would happen. This is the 3rd consecutive year that I have been able to warn in advance of escalated rocket fire from Gaza into Israel, proving that Mars still has an influence on events in Israel and in the world today for that matter. The question is, with this influence still largely in effect in today's world, what should people do about it. The answer goes back to the book of Numbers when the Israelites wandering in the desert were being attacked on a regular basis by fiery serpents. Compare this to today when Israel, year after year is being attacked by rocket fire. Well, back during time of Moses when the Israelites were wandering in the desert and being attacked by fiery serpents, he asked god for a solution. The solution to the problem of fiery serpents turned out to be constructing a brass image resembling the attacker, in that case, fiery serpents, and then having the Israelites stare at the image after being bitten so that they could avoid death from the serpent bites. Moses made a fiery serpent and put it on a pole. This new solution to terrorism and war is the very similar and falls in line with tradition. Ares, the Greek version of Mars, was an unpopular deity in ancient Greece because he was considered cruel, ruthless, and barbaric as a terrorist. During the Trojan war, however, Ares was wounded by Diomedes when Diomedes threw his spear at

Ares and wounded him. But Ares still lived. It was a wound that would have been fatal for any mortal. Mars, in Roman times, was considered in a more positive light, but Mars backed the Romans and helped them destroy the Jewish temple in AD 70 and is still working to resist the Jewish presence in Israel as indicated by the fact that escalation of rocket fire is coinciding with Mars being within 30 degrees of the lunar node. People in Israel/Palestine should view constructing an image to Ares/Mars from the vantage point of how Moses was ordered by God to create a brass image/statue of a fiery serpent. Hence Moses was not told how to go out and kill the fiery serpents. He was simply told how to keep the fiery serpents from killing the Israelites and solution did not involve striking the fiery serpents. It was simply staring and contemplation. Likewise in making an image to this Ares/Mars influence, we don't go out and fight against terrorism. We simply use an ancient method of staring and contemplation to keep that energy from from destroying people. There is no fighting involved here. This staring and contemplation should also involve staring at the planet Mars itself. This new statue should be named Armaaruss. Its an amalgamation of the gods of war, but notably Ares, who was for the most part, a terrorist god of war that was wounded by the spear and yet lived. His number is Mars 360, which is simply the revolution of Mars around the sun and its influence on humanity. Every person on earth is influenced by Mars in some manner and the Mars 360 system identifies how and comes up with a system in which each person would be assigned a number based on where Mars is located in their astrology chart, in order to facilitate understanding, which a necessary precursor to peace. In order for this system to work, it requires that everyone acknowledge Mars influence. And in such a system as Mars 360, even things like commerce—buying and selling--should revolve around people having outward indication of where Mars is located in their astrological birthchart. They can indicate this on their forehead or simply show it on an ID card. Its a very simple methodology. The demonstration of calling down fire from heaven was enough to convince people that Mars certainly has an influence on events in Israel and events around the world and on individual human beings. From this point after having demonstrated clearly for the last 3 years that when Mars goes within 30 degrees of the lunar node there is an escalation of rocket fire from Gaza into Israel relative to the rest of the year, this will eventually take on a life on its own. And one can say that the last 3 years, I have been instrumental in breathing life into what is Mars influence. Thank you…end

Here is an overview of the Mars 360 system and why it should be a worldwide accord. This video was made on July 19 2020
https://www.youtube.com/watch?v=w_MGptS4HWY

Here is the transcript

Hi this is Anthony. I want to make this video to explain exactly what the Mars 360 system is. The Mars 360 system is calculating your astrological birth chart and taking the information regarding where the position of Mars was located at the time you were born and placing that information on either your birth certificate, driver's license, state issued id, or any other form of outward insignia. The premise behind this idea is to alert others in a human community as to how to deal with you. In Ares Le Mandat, Mars is said to enact influence on human beings through reducing the amount of gray matter in the area of the brain associated with its natal astrological position. So there are six major lobes of the brain: the frontal lobes, the temporal lobes, the occipital lobe, the parietal lobe, the brain stem, and the cerebellum. So in astrology the astrological chart is divided into twelve 30 degree sectors and in Ares Le Mandat, I take that chart as it's divided into the twelve 30 degree sectors and essentially change it into being interpreted as only six 30 degree sectors; one sign and its correlating opposite sign is read as altogether one sign. So if you take a chart that has twelve 30 degree sectors and read it in that manner, it becomes interpreted as all together six sectors. So in Ares Le Mandat, the six lobes of the brain are correlated with the six seals in the Book of Revelation. The first seal would be at the mid heaven and is assigned to the occipital lobe of the brain and is responsible for how we develop our face-to-face communication within our immediate environment and how we feel about other people's property. If we move counterclockwise to the next 30 degree sector we get to the second seal which has been assigned to the temporal lobes of the brain which is responsible for our auditory processing, our hearing, our listening, and our thoughts. If we move counterclockwise to the next 30 degree sector, we get to the third seal which has been assigned to

the brain stem/ cerebellum portion of the brain, which is responsible for our breathing, our diet, our movement, and our basic survival skills. Now if we move counterclockwise to the next 30 degree sector, that portion is assigned to the frontal lobes of the brain and this section is responsible for our executive control functions, our ability to make decisions, engage in discipline, choose our words carefully, learn, our working memory, and our indirect communication and attitude to cultures that are not our own. So if we move counterclockwise[again], that portion has been assigned to the motor cortex portion of the brain which is near the top part of our skulls and is responsible for our ability to plan in advance movements. This portion of the brain is responsible for our work ethic, how we deal with authority figures, and our overall view of economics in general. If we go counterclockwise to the next 30 degree sector this is the last seal and has been assigned to the parietal lobe of the brain which is responsible for how we interpret sensory input from our environment, how we display ourselves in view of others, and how we interpret input from others within our environment. Now the premise is that Mars has an influence on the portion of the brain based on where Mars was positioned at the time you were born. So for example, if you were born when Mars was rising in the east, Mars would be affecting the frontal lobes of your brain and therefore causing you to display deficiencies in the designated characteristics that are assigned to the frontal lobe functions because the planet Mars causes a reduction in gray matter to certain portions of the brain based on where it was positioned at the time you were born. We as human beings can now in understanding that provide a certain amount of leeway to other humans as they engage or as they navigate through life in whatever way they see fit in terms of how they express themselves within a given society or within a given community. This element of understanding that comes into play is something that can be a great potential for peace, understanding, and justice here on earth. The idea of every human placing the location of Mars in their astrological birth chart on a birth certificate, on a driver's license, or state issued id or on some outward form of insignia where people in society can see how that person is influenced by Mars, we can thus provide ourselves an impetus to a more utopian society, to a more peaceful more harmonious way of life; something that's missing in contemporary times and something that has been missing going back to antiquity. The idea is that nations can apply the location of Mars wherever it was at the time a person was born to the state issued id, the driver's license, or the birth certificate as a measure of understanding or as a measure of keeping a certain amount of...or as a measure of

maintaining a certain amount of equilibrium and understanding within their society. So this Mars 360 system provides an opportunity for people who live in two different nations to maintain a certain amount of connection based on their Mars position. This can be done without any threat to national sovereignty or geographical borders. The main component that should arise from this Mars 360 system is the element of understanding whereas humans knowing how other humans are affected by the planet Mars and vice versa (other humans knowing how the individual is affected by Mars) can allow for humans to forgive or accommodate qualities that would normally be deemed unacceptable. It's not just having a Mars indicator on a birth certificate, driver's license, or state issued id or having some form of outward insignia that shows where Mars was positioned at the time you were born, it's also allowing society to divide itself or to sector itself based on each person's Mars position--meaning all the people in a given society who are affected by Mars in a certain way would would at the same time be accommodated by that society in which the society would create an atmosphere specifically for that group to express itself according to how Mars influences human beings. So for example, if Mars influences a certain sector of human beings within the society to be a little bit relaxed when it comes to face-to-face communication, the society would create environments where those particular humans can sort of act freely or display that tendency to have a certain amount or a certain lack of care regarding face- to-face communication. Society could create situations where this quality would not be looked down upon by anyone else because the environment would be understanding of that particular situation and this would apply not just to that particular Mars influence, it would apply to every type of Mars influence so the outcome would be at the very least a society divided into six sectors where each of the six Mars influences can be allowed to express themselves as Mars influences them to express themselves in a certain way-- to express themselves freely or feel that they don't have to try and overcome this Mars influence. This is essentially the gist of the Mars 360 system. You're in a nutshell allowing humans to be themselves and you're sort of forcing society to accommodate each human to be themselves according to how Mars influences them at birth. The outcome that should arise from the Mars 360 system is a certain amount of balance, harmony, and cohesion between government and people. Now ideally when it comes to the Israel Gaza Palestinian factor, Israel would be wise to set up some sort of observatory that would indicate where Mars is positioned in the sky just to encourage understanding when it comes to the Mars influence. So as spoken before: when Mars enters within

30 degrees of the lunar node there is an escalation in Israel where a higher than normal amount of rockets relative to the rest of the year are fired from Gaza into Israel. In response to this, Israel should create an observatory so that the people can see for themselves that when Mars goes within 30 degrees of the lunar node, it's invoking an influence that precipitates a certain level of violence and a certain level of strife-- a certain level of war. It should also be something that encourages people to understand that in order to remain safe in society, Mars has to be continuously observed; it has to be watched and it has to be noticed based on the statistics that I give in Ares Le Mandat. Not paying attention to the Mars influence will just continue to infect the human race with wars--with conflict without any of us really understanding why. Such problems continue to happen. So this is why I recommend that Israel would create some sort of observatory to the planet Mars to encourage the public to pay attention to its influence and also alert the public when Mars goes within that 30 degrees of the lunar node ....end.

Here is another request from Anthony that an image be made to the god of war. Here, Anthony admits that he is a muthpiece for Satan and after performing the sign of predicting the Israel-Hamas war in 2023, he proposes going after other gods and serving them. https://www.youtube.com/watch?v=yEsO6kcJxig

Here is the transcript

Hi this is Anthony we are currently under the alignment of Mars being within 30° of the lunar node. The previous video I predicted that when Mars would be within 30 degrees of the lunar node between August 24th 2023 and November 15 2023, Gaza militants would fire the highest amount of rockets during that time compared to the rest of the year. In 2023, the escalation that occurred earlier in the year occurred in May and that was during a time when Mars was not within 30 degrees of the lunar node. Back in May, Islamic Jihad, one of the Gaza militant groups, had fired roughly 1,400 rockets at the state of Israel, and after that happened it would have been easy to conclude that that particular time would have been the escalation period for 2023, but, as I said in the previous video, the time when Gaza militants would escalate rocket fire against Israel is usually when Mars is within 30 Degrees of the lunar node, and Mars didn't go within 30 Degrees of the lunar node until August 24th 2023 and it's going to remain there until November 15th. Today is October 11th and at the moment Israel has currently declared war against Hamas. Since October 7th, Gaza militants began firing a barrage of rockets at the state of Israel and over the course of just a few days. The number of rockets fired exceeded 5,000. This is this is happening exactly as predicted. This is the fourth year in a row that I've done this. So, for people have who have been following me since 2019, this is of no surprise. I've been doing this accurately every year since 2019 and this year is just another example. In the first video in which I predicted the escalation period for the year based on Mars being within 30 degrees of the lunar

node back in 2019, you can look at the first video that I did where I was predicting escalation of Rocket fire from Gaza into Israel back in 2019, you'll see how I was able to tie Mars to Satan basically ....um not just Satan but also 666, and after doing that, I demonstrated for consecutive years how Mars and this entire framework of Satan and 666 has direct influence on Gaza militants in Israel. In English Sumeran gematria, each letter is assigned a value that's based on increments of six, where “A” would equal “6”, “B” would equal “12”, “C” would equal “18”... so on and so forth. So in using this system, I was able to take the word Mars and add up the numerical value of each letter and get the number 306 and since Mars is involved in a revolution around the Sun I simply added 360 to 306 and that's how I got 666. So, that's how I was able to tie Mars to the influence of Satan and 666, and from that, I was able to find a link between Gaza militants and the movements of the planet Mars around the Sun, specifically when Mars goes within 30 degrees of the lunar node. Now I've demonstrated how this influence works. Since 2019, I predicted that Gaza militants would fire most most of their rockets that year when Mars would be within 30 degrees of the lunar node between January 15th 2020 and April 3rd 2020, and if you look at the stats which I'm going to leave below for people to to view themselves, you'll see that that prediction was essentially accurate. You know that most of the rockets fired that year in 2020 were fired when when Mars was within 30 degrees of the lunar Node between January 15th and April 3rd. And later that year in 2020, I made another prediction for the year 2021, and in that video, I predicted that in the year 2021 most of the rockets fired by Gaza militants would be fired when Mars would be within 30 Degrees of the lunar node between February 9th 2021 and May 13th 2021. And that turned out to be accurate as well. That's the year the Gaza War happened when in early May, Hamas and the Gaza militants fired over 4,000 rockets at the state of Israel. So that was a very intense conflict. And I continued forward with pushing...I continued forward with demonstrating this thesis when uh the very next year I was accurate again in observing Mars to predict when Gaza militants would fire most of the rockets most of their rockets in 2022. I predicted that Gaza militants would fire most of their rockets when Mars would be within 30 degrees of the lunar node between June 22nd 2022 and September 19th 2022, and lo and behold, that's exactly what happened. Islamic Jihad fired over 1100 rockets in between that time frame and it exceeded the amount of rockets fired at any other point during the year. And so that, I felt should have been enough....... I felt should have been convincing enough to show that Mars has, you know, very obvious purposes against the state of Israel,

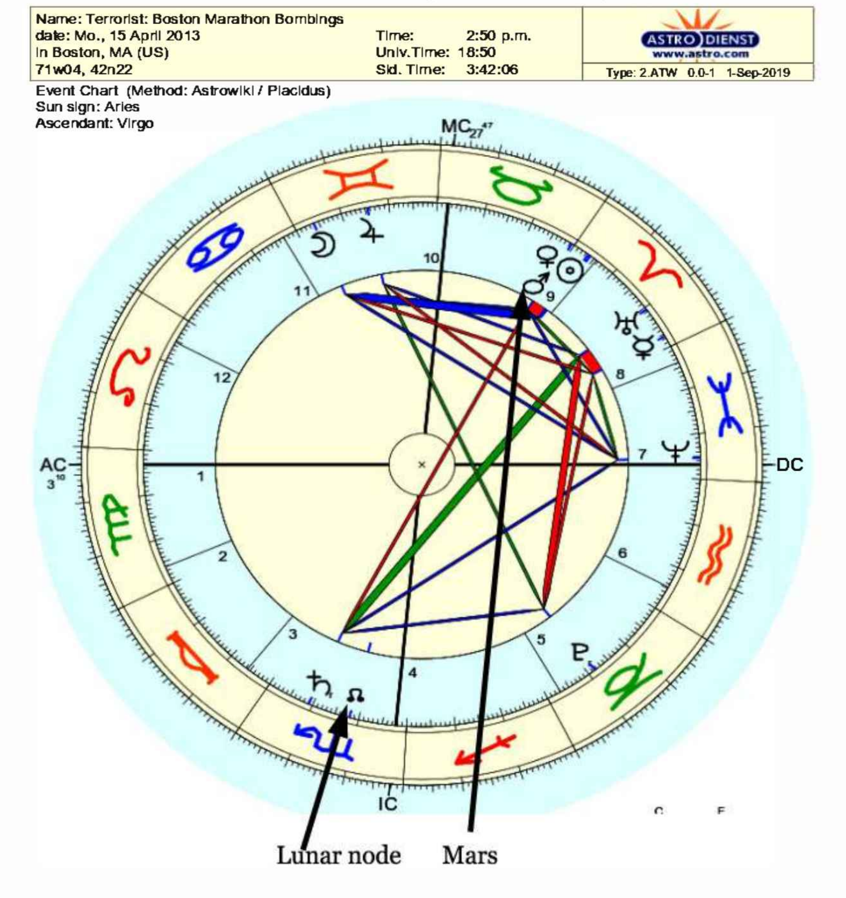

but it gained very little traction as far as viewership or acknowledgement. So what I did was for the fourth consecutive year, I decided to do the prediction again and this was in 2023. This year, I predicted that Gaza militants would fire most of their rockets when Mars would be within 30 Degrees of the lunar node between August 24th 2023 and November 15th 2023. And we're still in the middle we're still in the middle of that alignment, but Hamas has already fired 5,000 plus rockets at the state of Israel which exceeds ....by far exceeds the 1100[1400] that was fired back in May of 2023. And what's remarkable.... I mean what's really ominous about this year.....I think this year is an example of what the full brunt of Mars influence looks like when it has a direct influence on Humanity. I mean this is the god of war, Mars, that's acting on ....that's essentially.....this is the god of war, Mars, essentially infusing.....this is the god of war, Mars, infusing the enemies of Israel with all that evil and sadistic power and just bold aggressive sick satanic behavior. It's infusing the enemies of Israel to act out the full brunt and scale of what satanic power looks like. Some of the atrocities that Hamas and Gaza militants have committed during this time frame of Mars being within 30° of the lunar node is perhaps something unlike anything that's been witnessed in this generation. I mean, there have been reports of babies getting their heads chopped off, entire families being shot to death at point blank range, elderly being executed. I mean this is the full brunt of what Mars influence looks like when it's taken to its apex, and Satan is trying to send a message and the message that he's trying to send is that he's looking for some kind of acknowledgement. He wants essentially....he wants to be....he wants to be seen, he wants to be known, and I guess in a way he's he's trying to...he's using me to deliver deliver this message. And for the last four years, I've given people that have watched, I've given you all a sign and the sign being Mars within 30 degrees of the lunar node leading to escalated rocket fire from Gaza into Israel relative to the rest of the year has come to pass. It's played out exactly as I explained it ....as I said it would happen in the last four years. I gave you a sign and the sign came to pass and therefore I propose that we go after other gods, gods that you have not known and look for a way to serve them. So in saying this, I advise that we start making concessions to this god of war, who gets his power from Satan clearly, as we see the atrocious behavior of Hamas and Gaza militants during this Mars within 30 degrees of the lunar node phase. I advise that we begin making concessions to this god of war and give Satan what he wants. So here's how the the plan works if you can just bear with me for a second. Speaking as a prophet that is speaking on behalf of the god of War who gets his power from

Satan, it is advised that an image be made to the god of war and this god of war, historically his name has been Aries, Mars, Horus. There there have been other names for him, but in this generation, his name is to be Armaaruss, and what we have to do is..... we need to make an image to him and give him a platform here on the world stage and that image, that platform will be sort of a dwelling place for him. And in exchange for doing this, the god of war will reduce his influence on the enemies of Israel and the result of this would be that Israel will be able to live in peace and not have to deal with the Insidious nature of Mars influence on those who Harbor antipathy against the Jews in the state of Israel. Really, the nature of this is derived from, you know, as I mentioned before, it's derived from....it's derived from the Book of Numbers when the Israelites were wandering through the desert and they came across these fiery serpents that would bite and and kill them, and after repeated suffering caused from this, they eventually went to Moses and asked him to intercede on their behalf and come up with a solution, and Moses was told to make a bronze Serpent and put it on a stick and tell the Israelites that any time that they would be bitten by these fiery serpents, they could simply stare at the image and they would automatically be healed. And what I'm proposing follows along that same line where by making an image to this god of war that has endless antipathy towards Jews in the state of Israel, does not want them there, never has wanted them there. If we make an image to that, the result will be the same as it was for the Israelites, as explained in the Book of Numbers. The result would be an end to violence and antipathy against the state of Israel and the endless rocket fire, the terrorist attacks, and all the other heinous crimes carried out by Gaza militants would come to an end. So there it is. I've explained the whole purpose of my mission here...my mission since 2019 to get people to see that there is another god out there. There is an evil influence and this influence is Mars, but Mars gets his power from Satan. And by tying all of this to 666 using the English Sumeran gematria and adding up the the the value of the letters in Mars and getting 306 and adding 360, coming up with 666 by doing this, I was able to demonstrate that Satan is active in the world and I am serving as a mouthpiece. And the message is this—give Satan .....make some concessions to Satan, make concessions to the god of war. Give him an image give and a platform and the result of that will not only be peace for Israel, but it will be World Peace. I've also in the last four years have devised a system based on how Mars influences people at the individual level. It's called the Mars 360 system and there's a document online. It's called the Mars 360 Religious and Social System. Look up the PDF. You'll be able to find information regarding

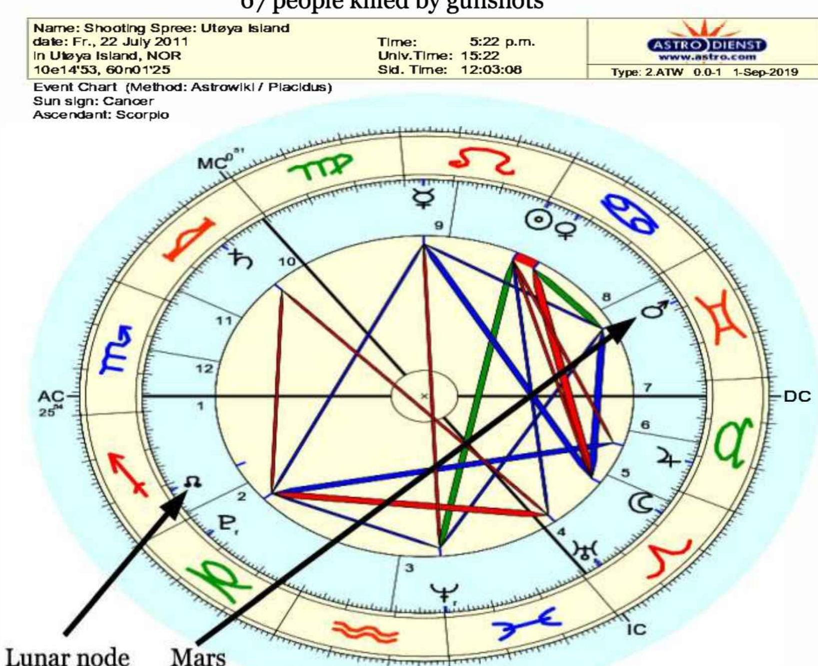

that system. And so the Mars 360 religious and social system is an entire system there and each person on the planet should be identified based on where the planet Mars was located at the time they were born, and the personality and characteristics that make up what defines that particular position of Mars in the natal chart. So, in another document, I explain how this can be applied in relation to the state of Israel. In a document called The Armaaruss Project, I advise that Israel begin to expand its biometric database to include other nations. With this biometric database system, people would have their Mars.... their natal astrological Mars position recorded into all the other factors that are assigned to their identity. And what Israel would do is get as many nations involved in this sort of a global concession or Global Accord and the result of this would be Global cooperation. It would be Global understanding ......which should ultimately lead to World Peace. So I I've gone through the entire process in leading up to this moment. Since 2019, I started calling fire down from heaven and this was to serve as a sign to convince you that Satan.... he still exists.... he is giving his power to Mars the god of war who is in turn directing the enemies of Israel to attack the state of Israel and to remove them from the land. This has been the task for Mars since day one and it's still happening today as demonstrated back in 2019. I've demonstrated this four consecutive years now with this year that we're currently in being the most convincing and intense display of satanic Mars influenced behavior that we have probably ever seen in this generation that we're currently in. The fact that I've been able to make this, to perform this demonstration for consecutive years, to be able to give a sign and have that sign come to pass justifies looking looking into this god of war and making concessions towards it because that's the only way that this problem of of violence and savagery and terrorism is going to be settled. We have to look at the source from a cosmic perspectiveand by doing so, the result will lead to Greater Harmony in the world, less violence toward the state of Israel and just overall prosperity.

The following are astrocharts calculated using the exact day, time, and place of the various terror attacks and shooting massacres that have occurred throughout the years. The factor presented here to be taken into observance is Mars within 30 degrees of the lunar node, and the moon within 30 degrees of the lunar node; both as predictors of human violent behavior. This information is intended mainly for probability theorists in France and India, but other scholars around the world can try to formulate an algorithm for the successful prediction of human behavior in regards to violence. Since Mars is within 30 degrees of the lunar node longer than the moon is, Mars's position there would imply a phase, while the moon's position there would imply a sudden event. These examples can be observed in tandem with the astrocharts presented in Chapter 20.

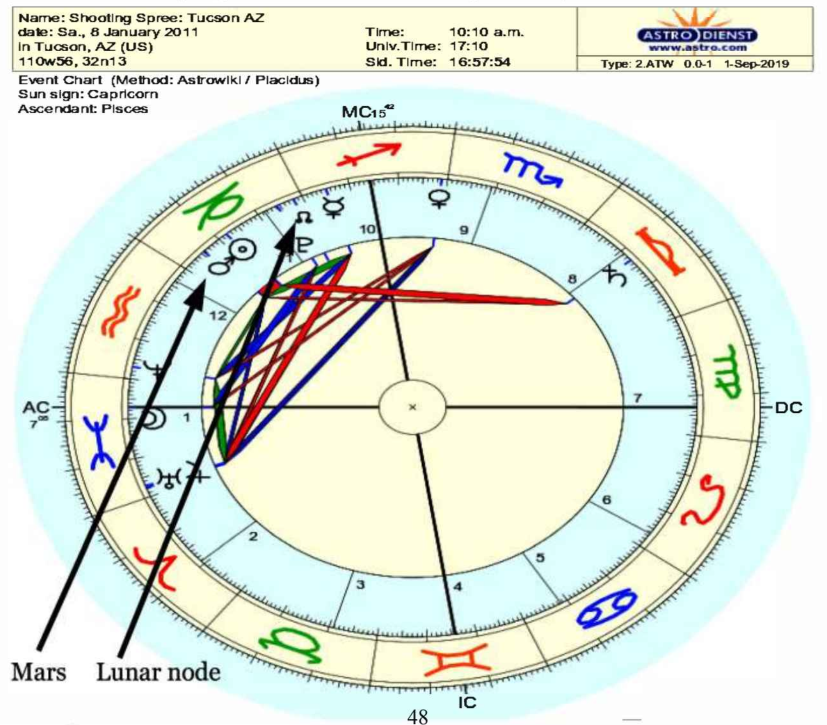

Boston Marathon Bombing. 3 killed, 141 injured

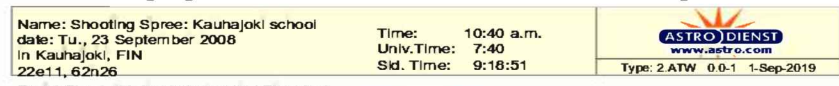

67 people killed by gunshots

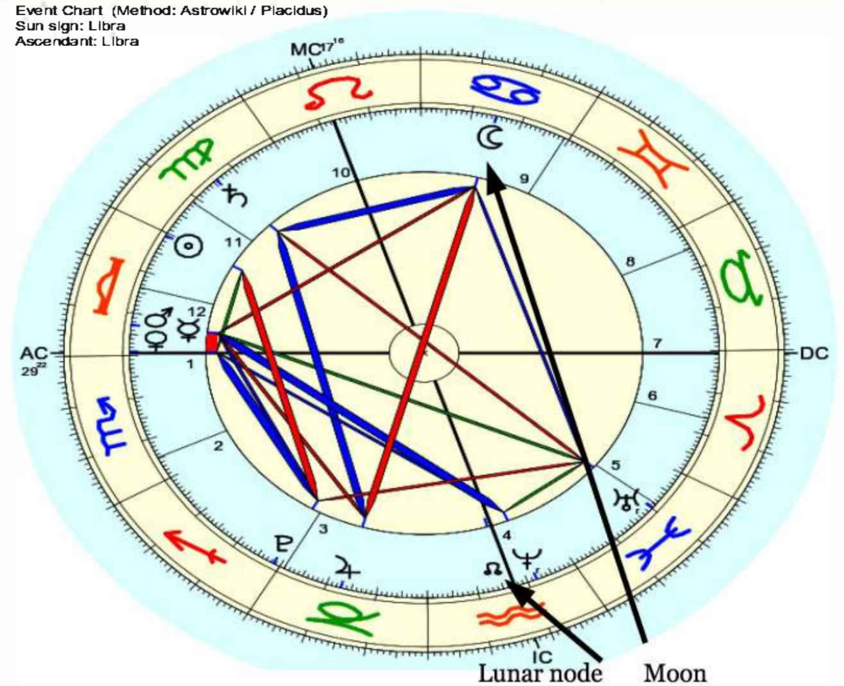

Six people were killed including a nine-year-old child

10 people killed with a Walther P22 semi-automatic pistol

killing spree in which 35 people were killed and 23 wounded

63 killed in Lebanon

The data on the previous pages taken with the data in chapter 20 concerning violent events results in 2 facts. Based strictly on the data, one can say that when Mars is in the first seal, as shown in chapter 20's examples, there is a high risk of terror attacks, and when the moon is within 30 degrees of the lunar node, no matter where Mars is located,(as shown in this chapter)the same chance of terror arises. In the previous examples in this chapter, we see that when Mars is not in the first seal...and a major terror attack does take place, the moon usually tends to be within 30 degrees of the lunar node

In the initial phase of Mars 360, a system of observation should be implemented and data regarding violent events should be indexed and stored for further study. 2 key observations.

Mars in the first seal (shown in chapter 20)

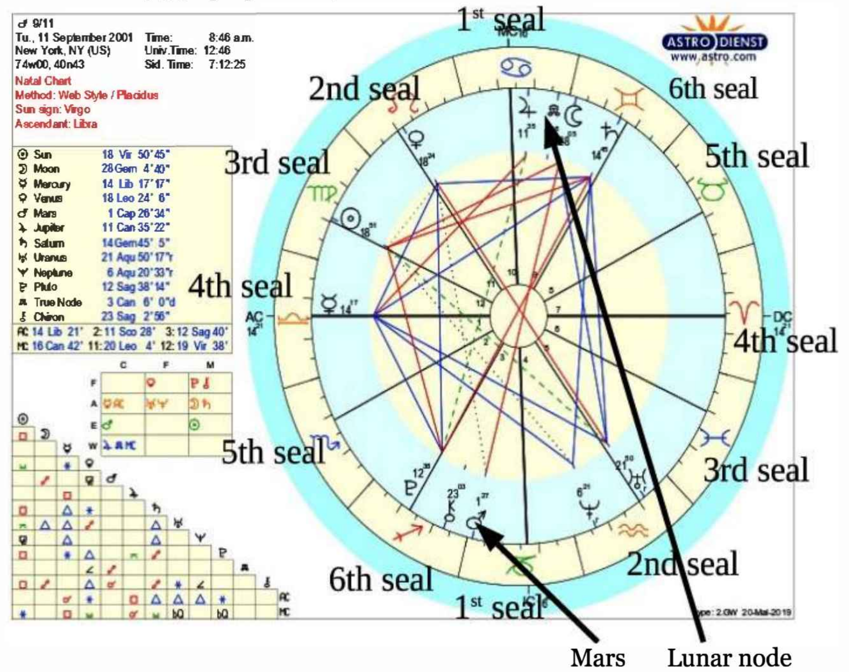

and the

Moon within 30 degrees of the lunar node(shown in this chapter)

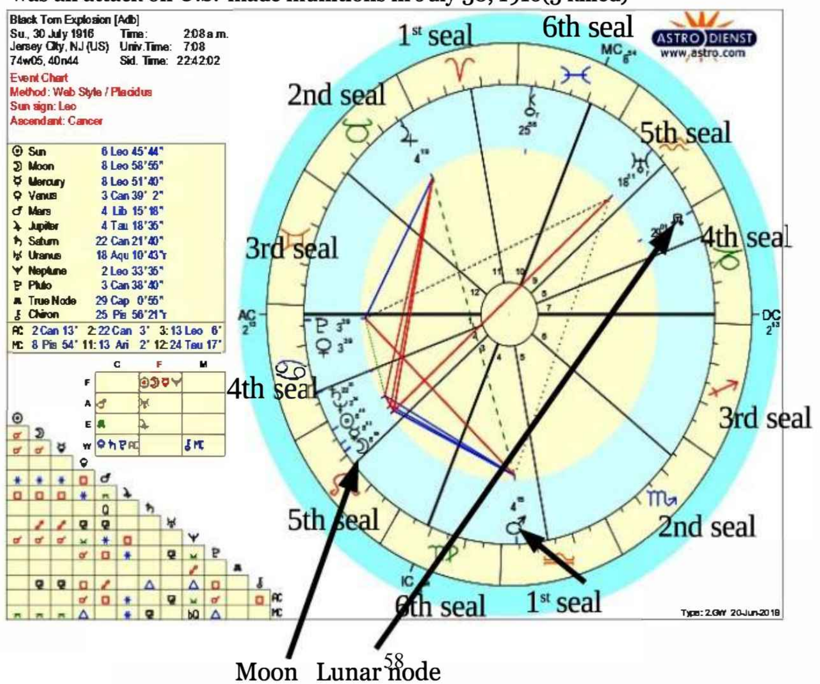

should be considered a matter of national security. Mars within 30 degrees of the lunar node should be considered a factor that intensifies the effect and the scale of damage from terror attacks arising when Mars's is positioned in the first seal.

On the next page are the same examples given in chapter 20, but with markers for Mars and the Lunar node to show the correlation between Mars in the first seal and the increased intensity of the correlating attacks when Mars shows up there within 30 degrees of the lunar node. The death toll is staggering compared to the death toll of when its Mars in the first seal without being within 30 degrees of the lunar node. In the data on the next pages, roughly 5,500 people were killed when Mars was in the first seal within 30 degrees of the lunar node, compared to around 300 being killed when Mars was in the first seal but NOT within 30 degrees of the lunar node. See the next page to observe.

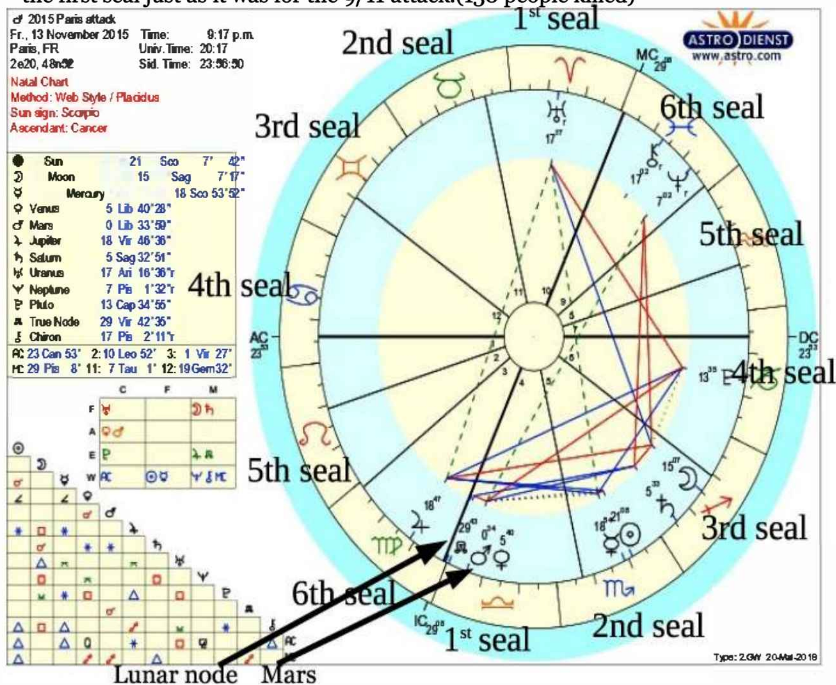

This is the chart calculated for the time the 9/11 attacks took place. Notice Mars in the 1st seal (2,996 people killed)

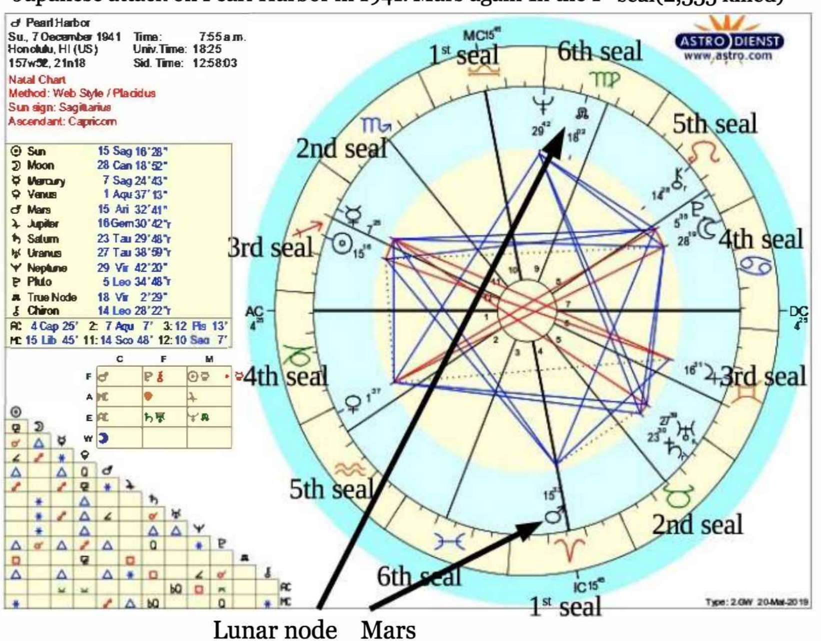

This is the chart calculated for the time of the black tom explosion, which was an attack on U.S.-made munitions in July 30, 1916(5 killed)

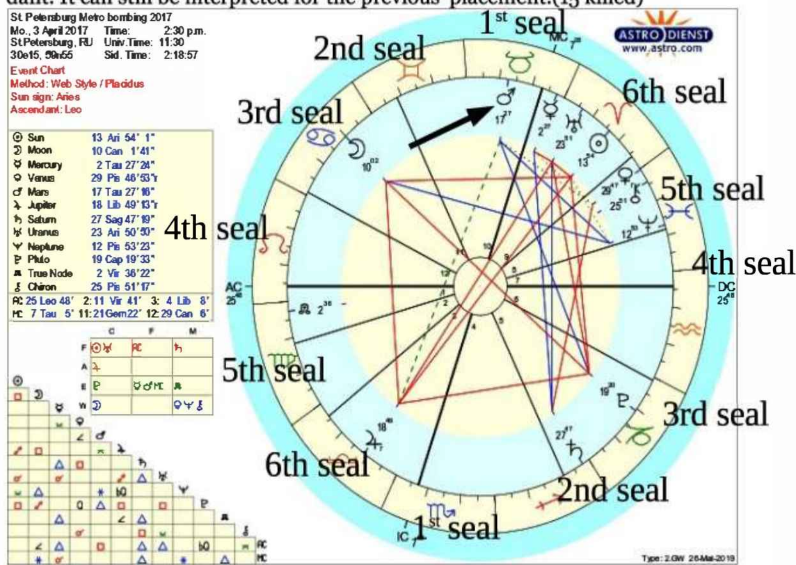

This is the Paris terror attack that took place in 2015. Notice Mars sitting in the first seal just as it was for the 9/11 attack.(130 people killed)

Japanese attack on Pearl Harbor in 1941. Mars again 1n the 1st seal(2,335 killed)

This is chart for the St. Petersburg metro attack that took place in 2017. Notice Mars sitting in the first seal during a transition phase at the Ascendant. It can still be interpreted for the previous placement.(15 killed)

This is chart for the Virginia tech massacre that took place in 2007 (33 killed)

This is chart for the Las Vegas shooting massacre that took place on October 1st 2017 (59 people killed)

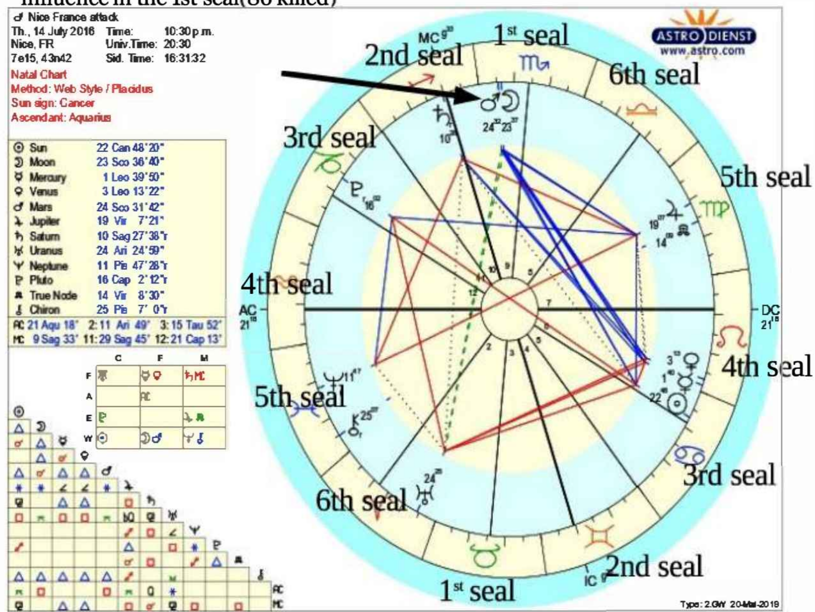

This is chart for the Texas Tower shooting massacre that took place in Austin, Texas on August 1 1966. The ascendant is going through the transition phase. (18 people killed)

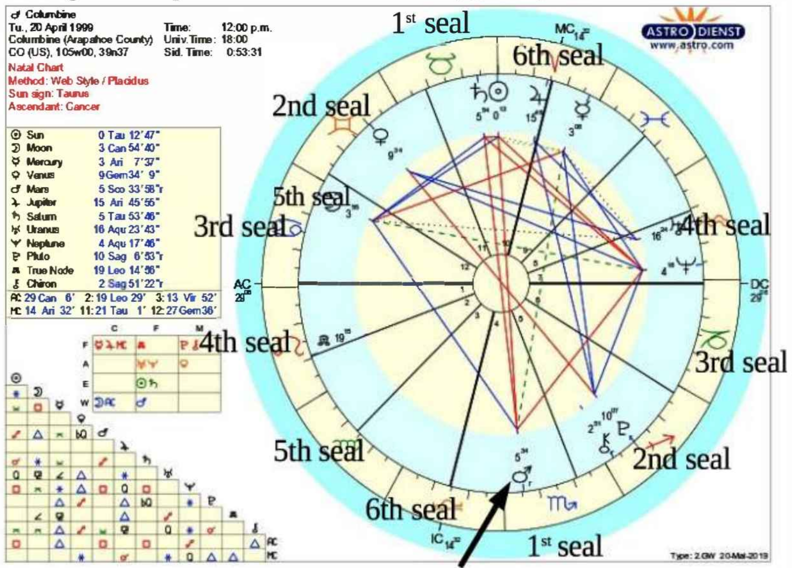

This is chart for the terror attack in 2002 in Kuta, Indonesia in which an explosion killed 202 people.

Lunar node Moon

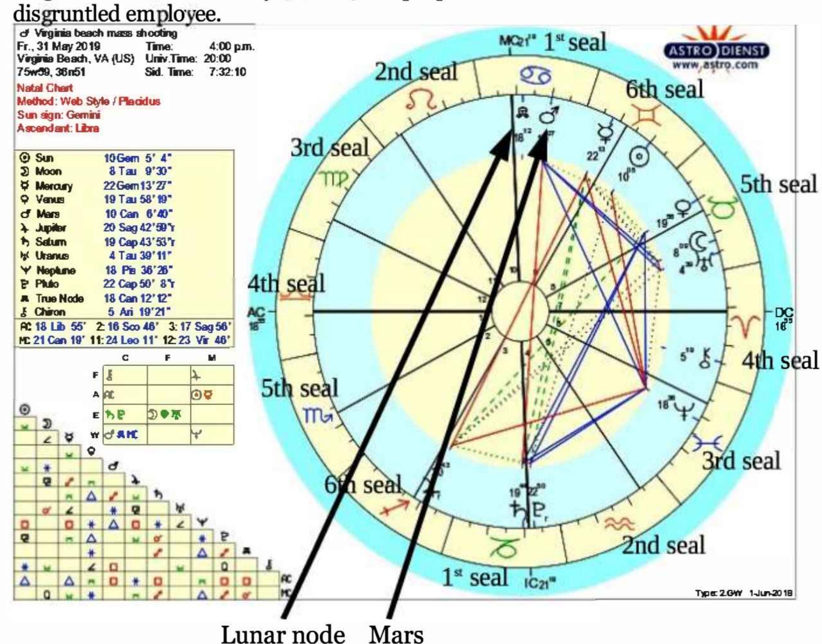

This is the chart for the attack that took place in Nice, France in 2016. Mars is in the first seal, overhead. At 24 degrees, its transitioning but still qualifies for influence in the 1st seal(86 killed)

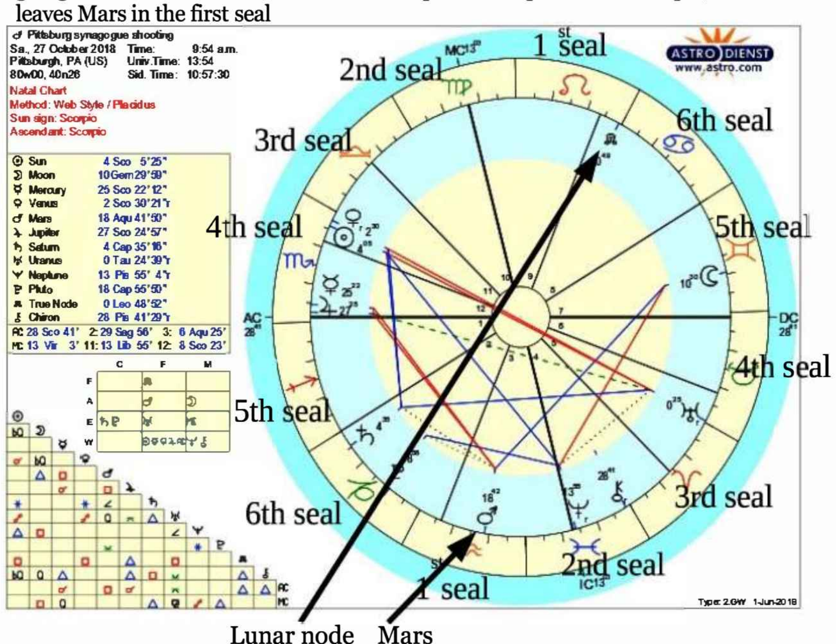

This is the chart for the Columbine attack that took place in 1999 when 2 kids at a high school opened fire on their classmates(13 killed)

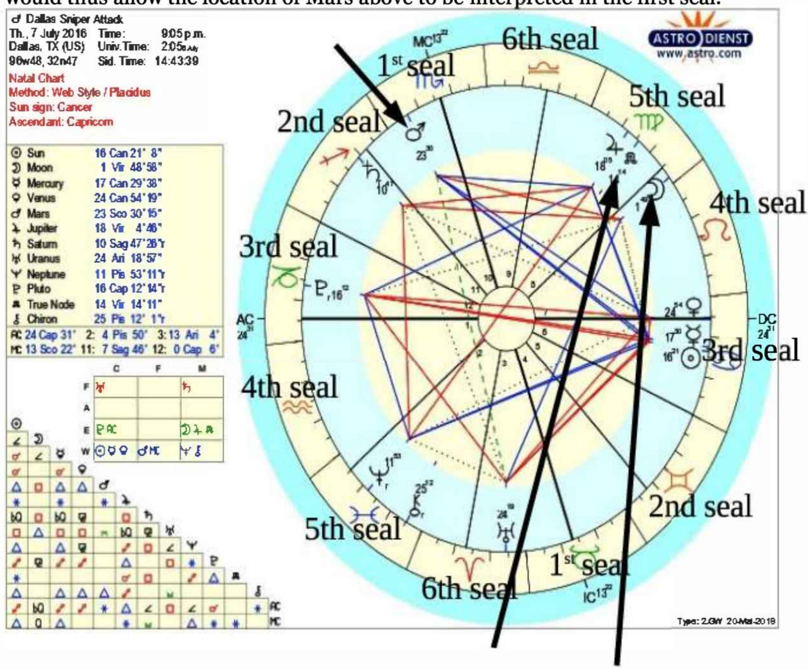

This is the chart for a mass shooting that took place at a Municipal Building in Virginia Beach, VA on May 31, 2019. 12 people were killed. The attacker was a disgruntled employee.

This is the chart for a mass shooting that took place at a synagogue in Pittsburgh, PA on October 27, 2018. 11 people were killed. There is transition going on at the Ascendant, but we can interpret for its position in Scorpio, which leaves Mars in the first seal

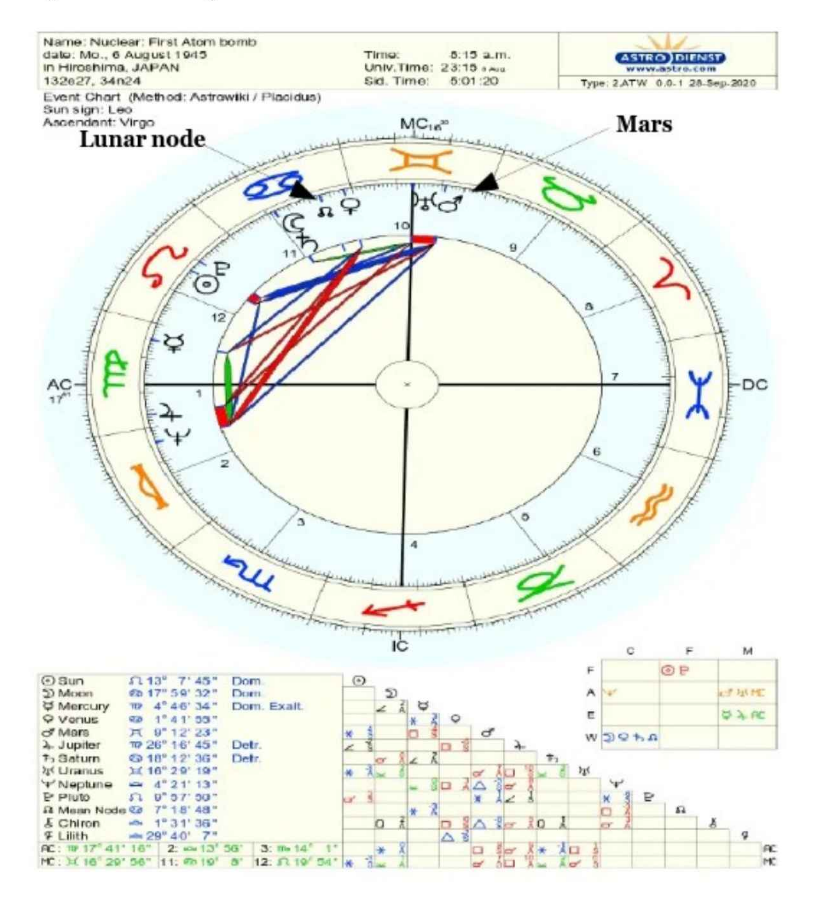

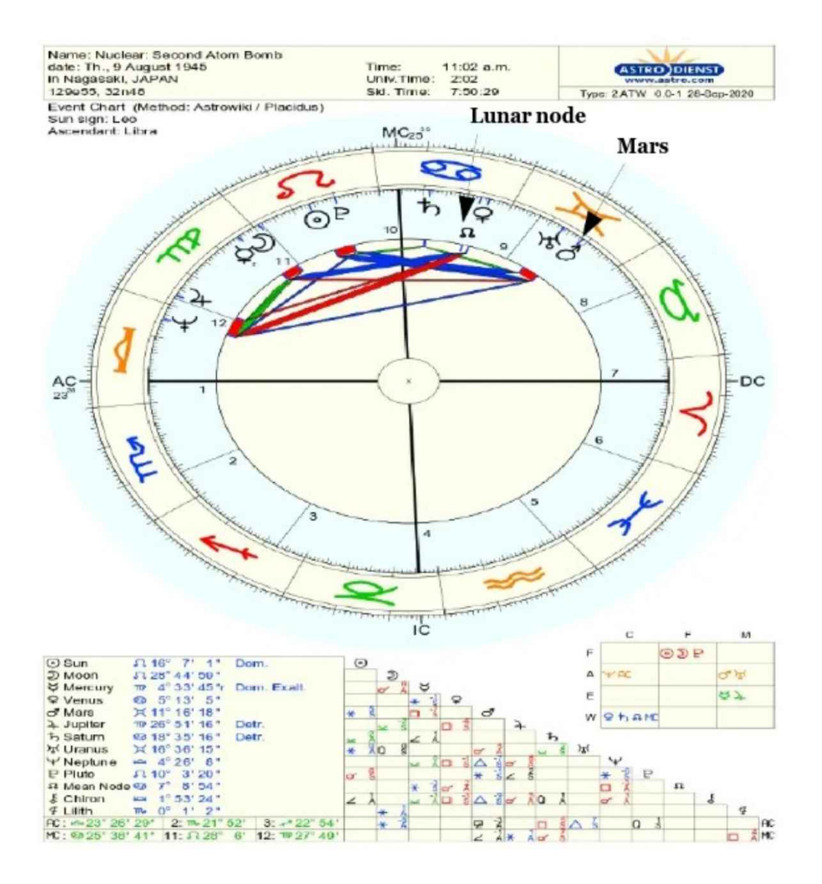

This is the chart for a terror attack that took place in Dallas, Texas in July of 2016 where man shot and killed 5 officers of the law. The ascendant line at the horizon transitioning into the next sign qualifies the next sign to be the 4th seal which would thus allow the location of Mars above to be interpreted in the first seal.

These previous examples further affirm that an observation of Mars in the First seal locations, along with the moon within 30 degrees of the lunar node(when the Mars is elsewhere), is a feasible starting point for a goal of trying to pinpoint exactly where and when an event could take place before the fact by simply by looking at the chart. A study of this phenomenon would allow the parameters to be narrowed down to a working model that could serve a life saving purpose in real time. This type of discourse alone allows the human condition to develop a sense of urgency beforehand, as opposed to after the fact. It's an evolution of the human psyche. Culturally, under the flexible Hindu system, it would not take much for India to provide an example of how to apply these concepts in practice and real time; concepts which also allow room for flexibility.

Below and on the next page are respectively the astrology charts for the exactdate and time of the dropping of the atomic bombs on Hiroshima, Japan and Nagasaki, Japan. Notice the planetary alignment of Mars just entering within 30 degrees of the lunar node. This should justify a greater sense of urgency regarding how the planet Mars influences human decision making and how it escalates conflict when it enters within 30 degrees of the lunar node. Circumvention of this Mars effect can be established with ceasefire agreements being established for that time-frame.

I conclude the writing here after completing a real time demonstration of theoracles explained in this book. This demonstration of calling (predicting) fire down from heaven was performed starting in 2019 and is currently ongoing as of 2023.

The next sections are two papers written by Anthony of Boston

1. Evidence concerning the exact day that Hamas and Islamic Jihad are choosing to launch their most significant attacks against Israel

2. How Israel could use astrology to conduct psychological operations against Hamas and Islamic Jihad terrorists, subdue the aggression and bring peace to the region.

This paper by Anthony of Boston seeks to narrow down the parameters in order to formulate an algorithm that can predict the exact starting day that Gaza rocket fire escalation relative to the year would occur.

Here are the remaining dates thru the year 2027 when Mars is within 30 degrees of the lunar node. Here you can review the past dates of Mars within 30 degrees of the lunar node and compare them to actual rocket fire statistics

Feb 4, 2026 - April 19, 2026
Sept 27, 2026 - June 12, 2027

In 2023, Mars was within 30 degrees of the lunar node between August 24th and November 15th. Here is the recent escalation in 2023, which began on October 7th. The astrology chart for October 7, 2023

shows Mars at near the exact same degree of the lunar node. Just 1 degree past the lunar node.

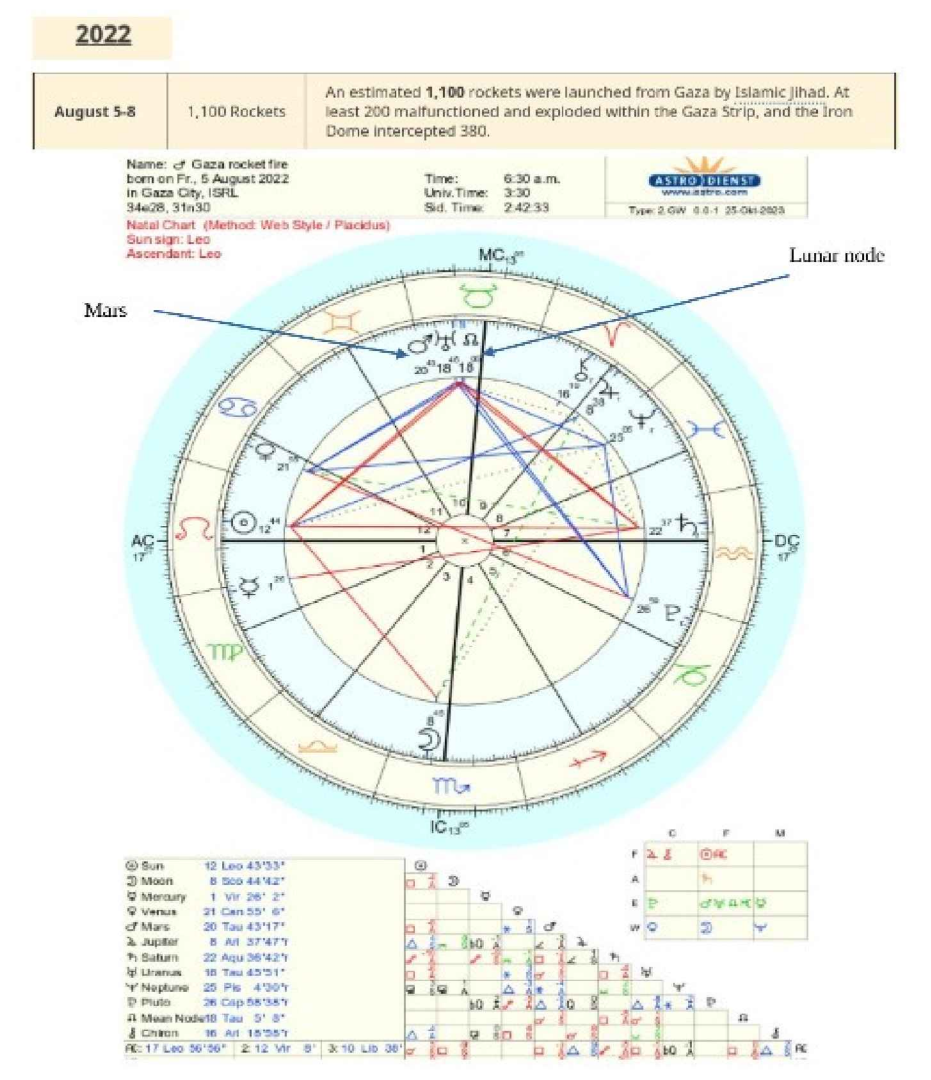

Evidence indicates that the start of escalation of rocket fire from Gaza can possibly be narowed down to the very day. Below are the exact start dates of the major esclation period during a given year. This data is taken from https://www.jewishvirtuallibrary.org/palestinian-rocket-and-mortar-attacks-against-israel

2023

October 7-23	**7,750+**	In the early days of the war in Gaza started by the Hamas infiltration and attack on Israeli civilians, more than **6,000** rockets were fired from Gaza. The bombardment has continued.

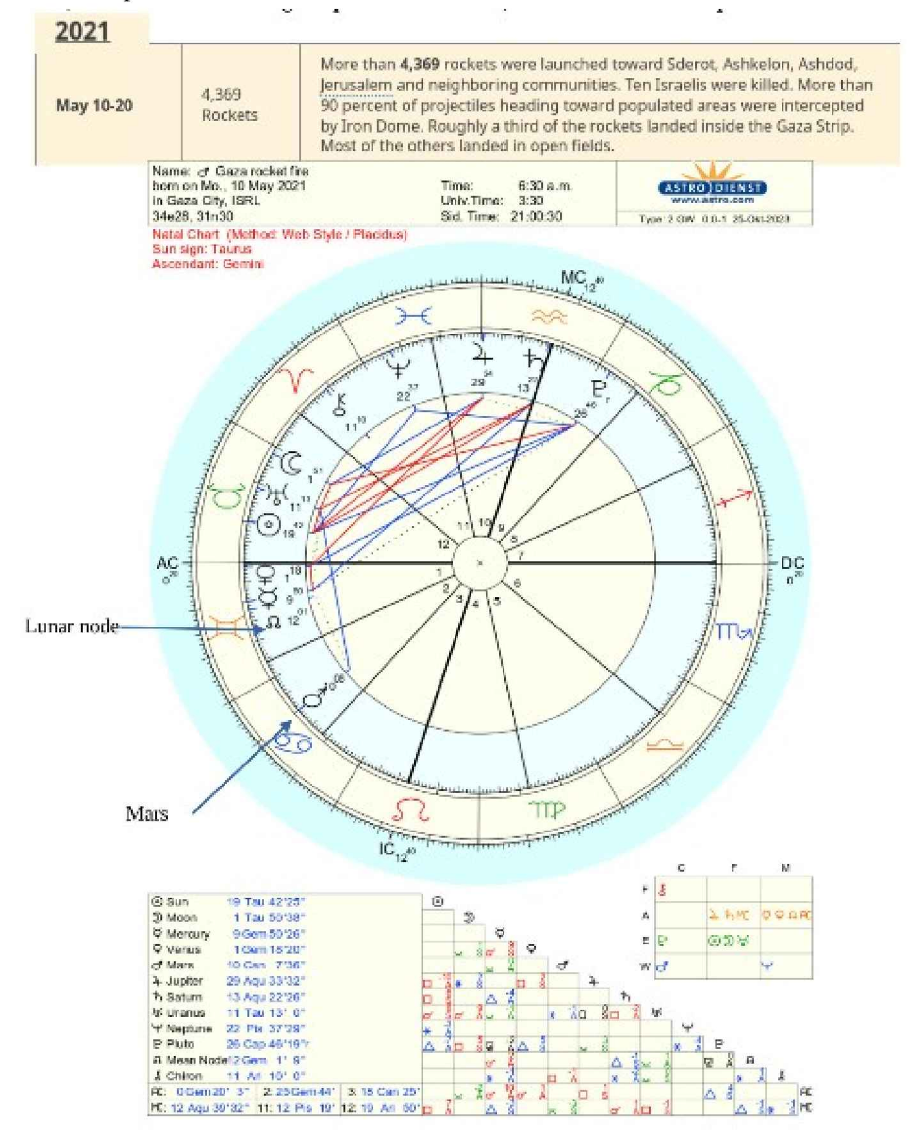

In 2022, Mars was within 30 degrees of the lunar node between June 22nd and September 19th. Here is the escalation period in 2022, which began on August 5th, 2022. The astrology chart for August 5th, 2022 shows Mars at near the exact same degree of the lunar node. Just 2 degrees past the lunar node

2022

August 5-8	1,100 Rockets	An estimated **1,100** rockets were launched from Gaza by Islamic Jihad. At least 200 malfunctioned and exploded within the Gaza Strip, and the Iron Dome intercepted 380.

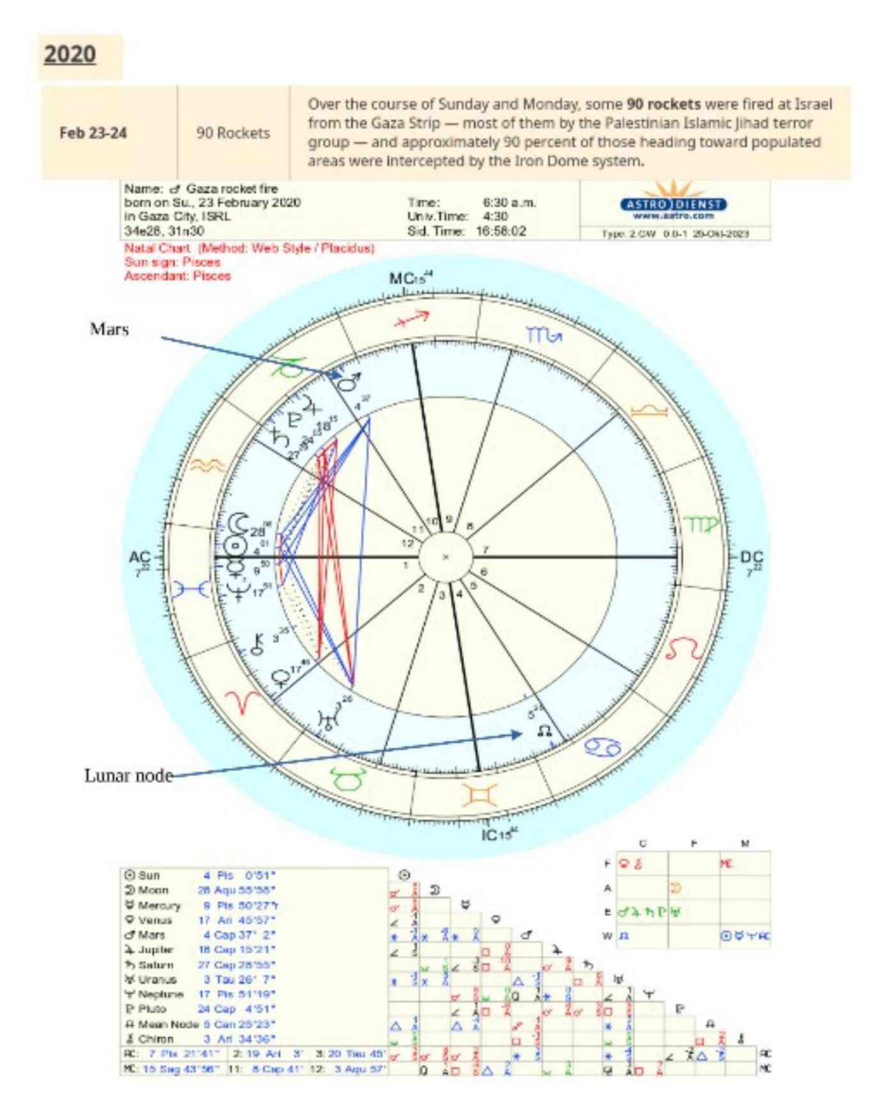

In 2021, Mars was within 30 degrees of the lunar node between February 9th and May 13th. Here is the escalation period in 2021, which began on May 10th 2021. The astrology chart for May 10th, 2021 shows Mars 28 degrees past the lunar node, towards the end of the phase.

2021

May 10-20	4,369 Rockets	More than **4,369** rockets were launched toward Sderot, Ashkelon, Ashdod, Jerusalem and neighboring communities. Ten Israelis were killed. More than 90 percent of projectiles heading toward populated areas were intercepted by Iron Dome. Roughly a third of the rockets landed inside the Gaza Strip. Most of the others landed in open fields.

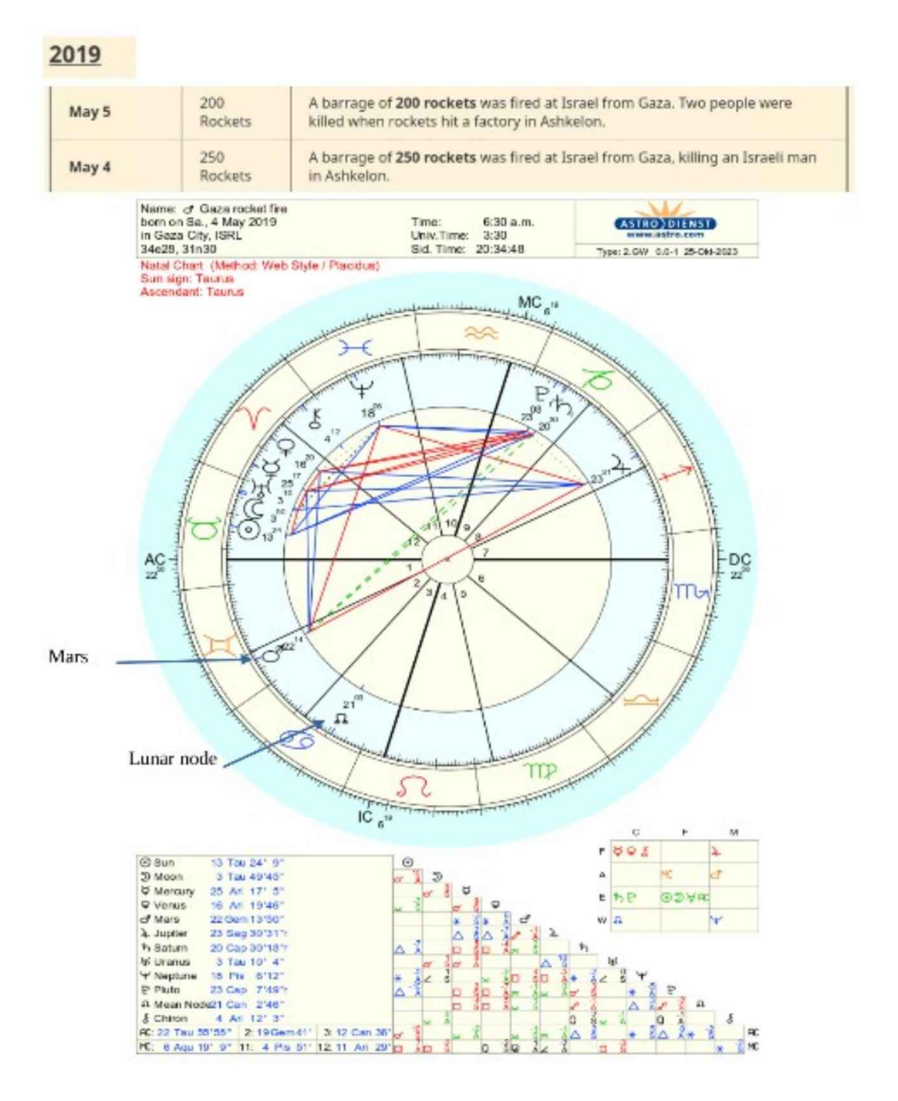

In 2020, Mars was within 30 degrees of the lunar node between January 15th and April 3rd Here is the escalation period in 2020, which began on February 23rd, 2020. The astrology chart for February 23rd, 2020 shows Mars within 1 degree of the lunar node

2020

Feb 23-24	90 Rockets	Over the course of Sunday and Monday, some **90 rockets** were fired at Israel from the Gaza Strip — most of them by the Palestinian Islamic Jihad terror group — and approximately 90 percent of those heading toward populated areas were intercepted by the Iron Dome system.

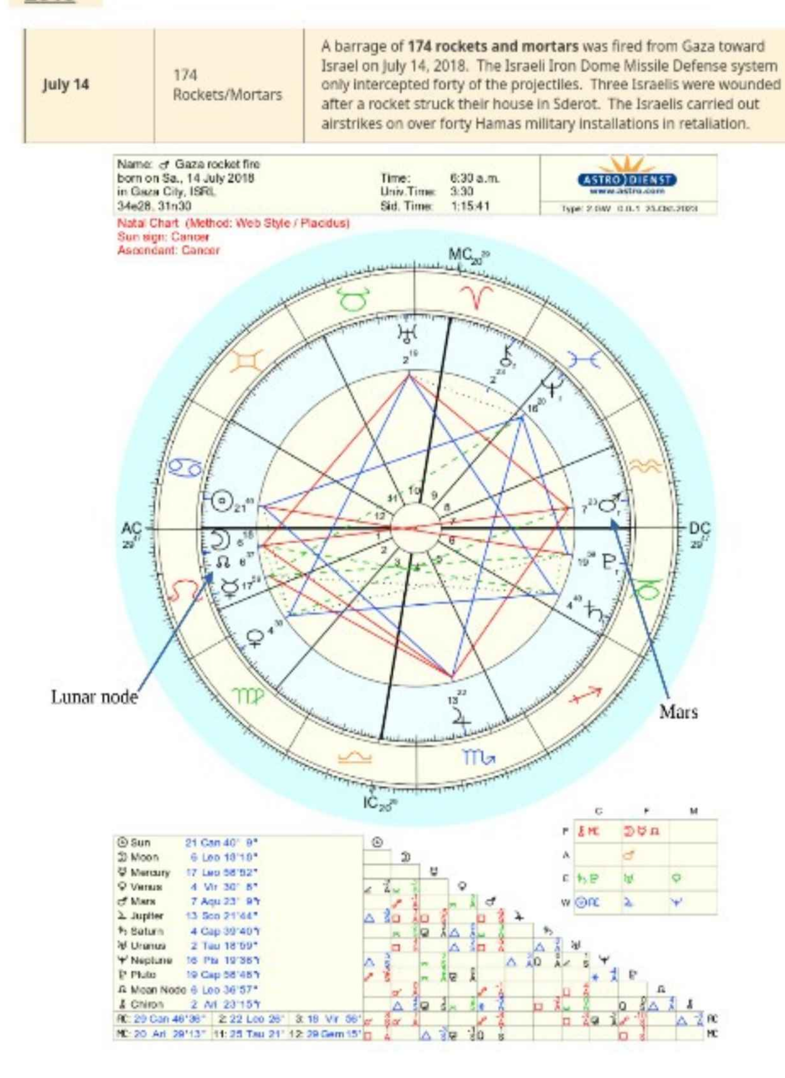

In 2019, Mars was within 30 degrees of the lunar node between May 1st and July 29th. Here is the escalation period in 2019, which began on May 4th, 2019. The astrology chart for May 4th 2019 shows Mars within 30 degrees of the lunar node

2019

May 5	200 Rockets	A barrage of **200 rockets** was fired at Israel from Gaza. Two people were killed when rockets hit a factory in Ashkelon.
May 4	250 Rockets	A barrage of **250 rockets** was fired at Israel from Gaza, killing an Israeli man in Ashkelon.

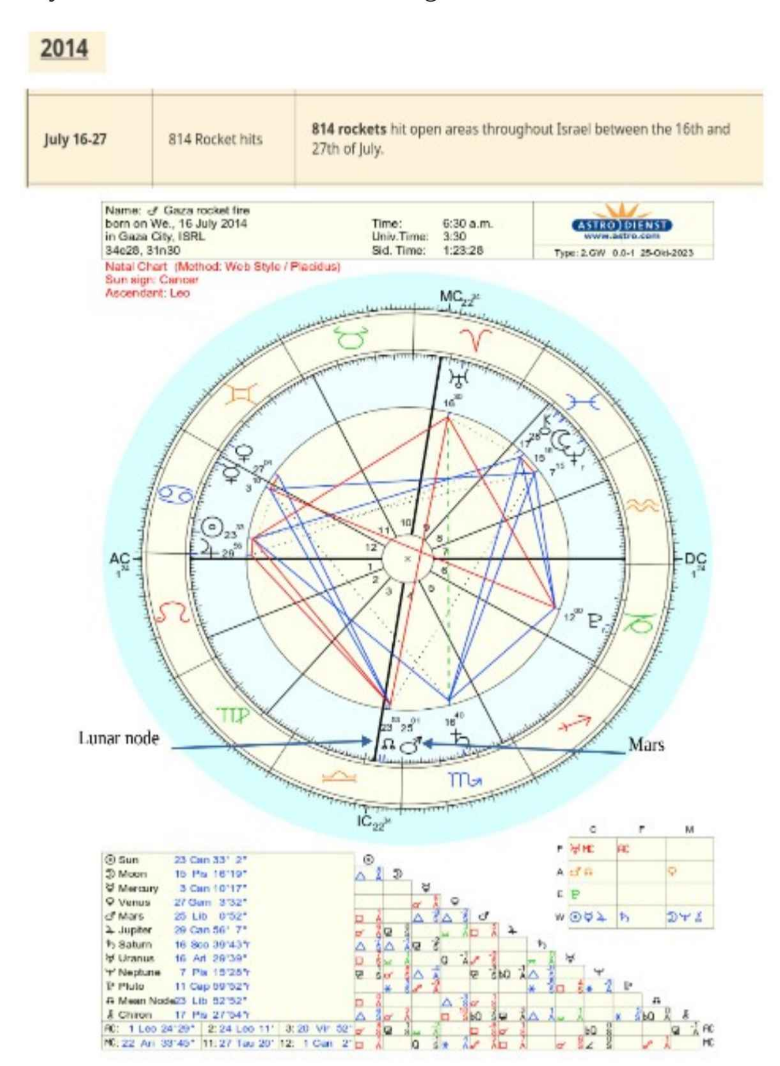

In 2018, Mars was within 30 degrees of the lunar node between April 8th and November 14th. Here is the escalation period in 2018, which began on July 14, 2018. The astrology chart for July 14th 2018 shows Mars within 1 degree of the lunar node

2018

July 14	174 Rockets/Mortars	A barrage of **174 rockets and mortars** was fired from Gaza toward Israel on July 14, 2018. The Israeli Iron Dome Missile Defense system only intercepted forty of the projectiles. Three Israelis were wounded after a rocket struck their house in Sderot. The Israelis carried out airstrikes on over forty Hamas military installations in retaliation.

In 2014, Mars was within 30 degrees of the lunar node between December 19th 2013 and August 28, 2014. Here is the escalation period in 2014, which began on July 16, 2014. The astrology chart for July 16h 2014 shows Mars within 1 degree of the lunar node

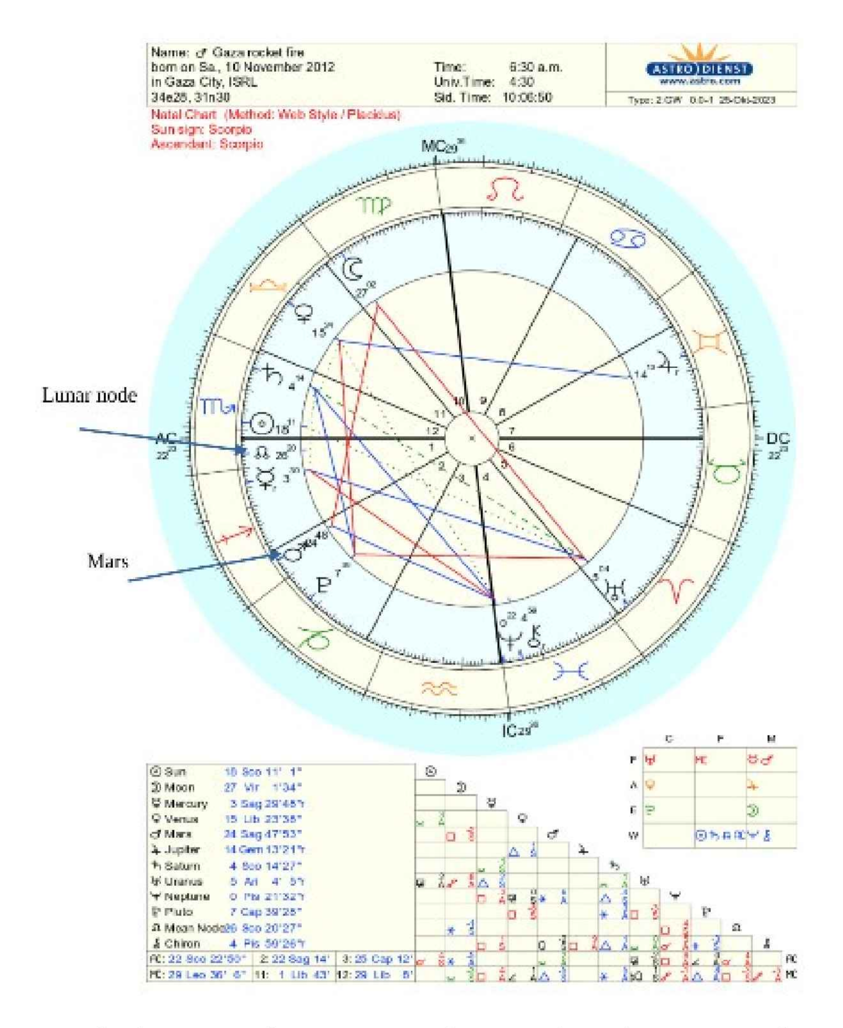

2014

July 16-27	814 Rocket hits	**814 rockets** hit open areas throughout Israel between the 16th and 27th of July.

In 2012, Mars was within 30 degrees of the lunar node between August 24th and November 12th. Here is the escalation period in 2012, which began on November 10, 2012. The astrology chart for November 10, 2012 shows Mars 30 degrees of the lunar node near the end of the phase

2012

November 14-21	933 rockets	**Operation Pillar of Defense**: On the morning of November 15, **three Israeli civilians were killed** when a rocket directly struck their apartment building in the city of Kiryat Malachi. **Three children, among them two young babies, were also wounded** in the strike. **Three IDF soldiers were wounded** in a separate attack when mortar shells exploded inside their base near the Gaza border. On November 16, a rocket fired from Gaza landed outside Jerusalem. On November 20, an **IDF soldier-Cpl. Yosef Fartuk-and a civilian-Alayaan Salem al-Nabari -were killed** when a mortar fired from Gaza exploded in the Eshkol regional council. **Five IDF soldiers were wounded** when a rocket landed inside their holding area on the Gaza border. Also on November 20, a GRAD rocket scored a direct hit on a residential apartment building in the city of Rishon L'Tzion, **wounding one person moderately and sending nearly ten others to the hospital with shock.** **In total, terrorists in Gaza fired more than 1,500 rockets at Israel during this period-933 struck inside Israel, 421 were intercepted by the Iron Dome Missile Shield, and 152 rockets landed inside the Gaza Strip.**
November 10-13	One hundred twenty-one (121) rocket hits	In distinct escalation, Palestinian terrorists in Gaza launched more than 150 rockets at Israel; at least 121 rocket hits were identified in Israeli territory. A total of 64 rockets hits were identified on November 11. A number of mortar shells were also fired. A number of Israeli civilians were wounded by the rocket fire, although not seriously; several were treated for shock and there was extensive property damage.

The key extrapolation we can take away from the most significant escalation periods over the past 10 years in Israel is that Gaza militants tend to launch attacks either at the exact beginning, the exact middle, or the exact end of the Mars-within-30-degrees-of-the-lunar-node phase. In these examples, the highest escalation of rocket fire for the years 2014, 2018, 2020, 2022, and 2023 all commenced when Mars was in the exact middle of the Mars-within-30-degrees-of-the-lunar-node phase, give or take 1 or 2 degrees. In the years 2012 and

2021, the highest escalation for the year commenced at the very end of the Mars-within-30-degrees-of-the-lunar-node phase, give or take 1 or 2 degrees. In 2019, the highest escalation for the year commenced at the very beginning of the Mars-within-30-degrees-of-the-lunar-node phase.

Section II - Use of astrology for conducting Psychological Operations against Hamas and Islamic Jihad

This paper explains the commencement of psychological operations against global terrorism, along with the re-assertion of global governance with Israel at the center. The first measure to be taken against global terrorism will be the Israeli media's presentation of a theological development of Satan and the evidence of his influence, which has been quantified by Anthony of Boston. Using the concept of calculating what has long been considered the number representing Satan, that being 666, Anthony of Boston has devised a method to link 666 to the revolution of the planet Mars around the sun and its influence on human behavior. After achieving this, he found a strong link between the influence of Mars and the timing of terror attacks around the world. Most notably, however, was the position of the planet Mars and the timing of escalated rocket fire from Gaza into Israel. Since 2007, there is a strong correlation between the times that Gaza terrorists such as Hamas and Islamic Jihad decide to upscale their rocket attacks against Israeli civlians. It is likely that they are unaware of this influence, but still and all, the data shows that Mars is exerting its most ominous influence on Gaza militants, perhaps prioritizing this conflict moreso than others because it involves Israel. I argue that Satan has a hand in this dynamic by granting power to Mars for this purpose of destroying Israel at all costs, always looking to back any entity that is proving itself most hostile to Israelis/Jews. Back in AD 70, it was the Romans and thus Satan that would be successful in empowering the Roman god of war, Mars, to drive the Jewish people out of their land, as the Roman army marched into Jerusalem and destroyed the Temple.

In order to curtail terrorism, Israel would present to the terrorists evidence of their link to Satan, setting the stage for confusion and attempts on the part of terrorists to shirk this designation. In retrospect, Anthony of Boston calculated 666 (Satan) to Mars 360. He used the English Sumerian Gematria, of which assigns a numerical value to each letter of the alphabet using multiples of six. A=6, B=12, C=18, etc… After doing this, he discovered a link between Mars and global terrorism and Gaza militant rocket fire escalation. He not only lays out the evidence that tracks the Mars/Satan influence on Gaza militants since 2007, he also demonstrated how it would apply in the future by making videos predicting escalation of Gaza rocket fire in real time, all by observing when Mars would be within 30 degrees of the lunar node. He has achieved this from 2019 up unto now in 2023 as the Israel-Hamas war is happening. See the data

Dates of Mars-within-30-degrees-of-the-lunar node

March 19 2007 - May 30 2007 Apr 28 2008 - Jul 31 2008 Jan 08 2009 - Mar 24 2009 Aug 24 2009 - May 02 2010
Nov 02 2010 - Jan 18 2011 Jun 11 2011-Sep 01 2011 Aug 24 2012 - Nov 12 2012 Apr 03 2013 - Jun 22 2013
Dec 19 2013 - Aug 28 2014 Jan 27 2015 - Apr 12 2015 Sep 27 2015 - Dec 26 2015 Nov 21 2016 - Feb 01 2017
Jul 11 2017- Oct 10 2017 Apr 08 2018 - Nov 14 2018 May 01 2019-Jul 29 2019 Jan 15, 2020 - Apr 3rd 2020

Below are future dates of Mars within 30 degrees of the lunar node

Feb 9, 2021 - May 13, 2021
Nov 4, 2021 - Jan 22, 2022
June 22, 2022 - Sept 19, 2022
Dec 26 2022 - Jan 24, 2023
Aug 24, 2023 - Nov 15, 2023
April 12, 2024 - June 25, 2024
June 5, 2025 - Sept 4, 2025
Feb 4, 2026 - April 19, 2026
Sept. 27, 2026 - June 12, 2027

If we look at the data between 2007 and 2023, we see that in 12 of those 17 years, most rockets were fired while Mars was within 30 degrees of the lunar node. This means that there is a 70% percent chance that Gaza militants will conduct their most significant terror operations against Israel during that Mars/lunar node phase, which is also the time of Satan's most potent influence. What this paper is saying is that this information can be presented in Israeli media and have a huge psychological impact on terrorists because it proves that Satan is very real in possesessing Gaza militants to conduct terror attacks. And they(the terrorists) being religious extremists that

presume God is on their side, will not want to be consigned with Satan in any way, and thus the terrorists will scramble to avoid this consignment, perhaps avoiding launching attacks against Israeli civilians. The result will be less casualties on both sides of the conflict, Israeli and Palestinian.

On a larger scale, it would not only be presented to the public that Gaza militants are possessed by Satanic influcence via Mars, it would also be articulated that anyone aligning themselves with Hamas and Islamic jihad are indeed part of a consortium that is led by Satan. This would include Iran and Russia. In order to use this dynamic to their advantage, Israel would explain that any nation can avoid being aligned with a Satanic consortium, by joining with Israel's biometric database and facial recognition program. With all the data servers in Israel, every nation that joins will have an interest in maintaining and protecting such a location. Israel should also use the Mars 360 system in tandem with their own biometric database and begin assigning and fostering new demographics based on personality and character. Under Mars 360, the human race is divided into 6 personality distinctions based on Mars influence. Mars 360 is just a formulated and hypothesized global social accord ideally operable under the same principle as the Paris Climate Accord, which attempts to integrate all nations into a common cause without undermining national sovereignty. The Mars effect on human behavior inclines each individual toward certain predispositions that lend itself to fundamental outlooks which carries with it... a high degree of inflexibility. This inflexibility plays itself out in various political and social stances like socialism, pacifism, capitalism, liberalism, conservatism, libertarianism, etc, but is actually the result of Mars's permanent influence on the human brain. This gives rise to the idea that while certain stances are different in external display, they are at the same time fundamentally backed by the same source(to varying degrees of course)....which is Mars.

From a religious standpoint, it is advised that an image be made to this Mars force under the same dynamic by which the ancient Israelites made an image to its attacker in order to stop the attacks. In the book of Numbers, the Israelies were being attacked by fiery serpents and the only way to stop the attacks was by making an image that represented a fiery serpent. Israel can do the same with regards to Mars-influenced attacks—essentially make an image to Mars. Name him Armaaruss in order to cover all the gods of war that have attacked

Israel all throughout its history. The result should be peace for Israel and the Palestinians.

A good starting point is here. This is the first public act of calling down fire from heaven in 2019, in this video Mars is extrapolated from 666 and then proven to be a force acting in favor of Gaza terrorists.

Section III
Hamas tunnels and how they can be detected

Subterranean Warfare

In building upon this thesis concerning the 2 sides of health, I offer an explanation that would further expound on how there must be an opposing or offsetting effect to everything. We will look at the opposing effect between air power and subterranean power. Throughout the history of warfare, subterranean structures have been used against enemy forces with great success. Back during the Arab invasions in the 7th century, monks found that they could successfully evade Arab forces by hiding underground. Back in WWII, the Japanese were effective in building underground fortification against US air power, and so were the Chinese, who built underground fortifications against Japanese air power. The Vietnamese during the Vietnam war was possibly the best example of how effective underground fortifications are against a superior air force. Many of the larger military powers, have had no formidable answer for this type of defense, even against small pockets of militants. The current conflict in the Middle East(2002-2021 as of now) is marred by the continued survival of these insurgent militant groups. Major powers like Russia and the United States have carried out a number of aerial attacks against them in recent years, but only with enough success to weaken the threat, not totally eliminate it. In recent years, Israel has faced numerous problems with the underground operations of Hamas, the militant group that controls the Gaza strip. Not only for smuggling resources into Gaza, the tunnels used by Hamas has allowed them to, at one point, ambush and kidnap an Israeli soldier

from Israeli territory. Hamas is also able to conceal ballistic fire locations with the use of the tunnels, making it more difficult for Israel to locate and destroy them. This underground methodology is also how ISIS, the Al Qaeda offshoot terror organization, continues to launch ambush attacks against Syrian regime soldiers, even after years of being bombarded by both US and Russian airstrikes. The operations of Hamas and ISIS and their continued survival in small numbers is setting the stage for a new type of warfare: Subterranean warfare. It's obvious that the larger powers have no real answer on how to battle effectively against underground forces, other then planting explosives at the entry or exit points or using aerial bombers to drop deep penetrating missiles into tunnel locations. This, however, is largely ineffective since many underground structures have detours that lead to multiple entry and exit points, making the destruction of them much more complicated. It also doesn't help that the sections which have been demolished by explosives are easily repairable. Another issue surrounding the search and destroy aspect of combating this underground system is that soldiers are often unable to determine whether or not the tunnels are booby trapped.

This type of warfare has been effective for centuries; what ISIS and Hamas is doing is bringing notice to it. In fact, most nations in the Middle East and around the world for that matter already have these underground structures in place and will only be emboldened against stronger nations the longer a small number of militants—relatively speaking--are able to survive by simply building underground fortifications. Israel and the US are working on technology that will allow them to detect underground tunnels, and if they are successful, we may see an end to the prolonged conflict in the Middle East. If not, then we can expect that everyone there will attempt to pursue self determination without regard for another country's superior air power. The technology used to detect underground tunnels involve the use of seismic or gravity detectors. Seismic detectors are able to measure the vibrations as they pass objects beneath the surface of the earth, and if able to find a common anomaly that would identify the existence of a tunnel, those detectors could be effective. However, there would still need to be intelligence that pinpoints the general area of where a tunnel may exist. Gravity detectors like gravimeters are able to detect changes in the Earth's gravitational field based on the density beneath the surface. The presence of a void underground would reduce the

gravitation force and would thus show up accordingly on the gravimeter. Another method is measuring the voltage of an electrical current, which would move at a lower voltage inside a void. Ground Penetrating radar(GPR) is another device used to detect tunnels. GPR uses pulses of radio frequency energy to see underground. The distances detected underground however is limited, since it maxes around a depth of 50 ft. Tunnels have been dug by drug smugglers and militants as far as 100 ft beneath the surface. The use of bunker busters(aerial bombers employed by the US against ISIS) which can penetrate hundreds of feet of both earth and concrete, is still challenged by the possible extensiveness of the tunnels. Some tunnels have multiple detours that allow for escape and reconstruction of damaged sections. Drug smugglers now present a much higher risk in terms national security, since a tunnel system is both a defensive and offensive weapon--irrespective of its use in drug smuggling activities. The arrest of two Houthi militants at the US/Mexican border in 2021 raises the question of vulnerability, since one can posit that infiltration of Latin America by radical militants puts the US at risk of not only the implication of undetected drugs coming into the country, but also the implication surrounding the likelihood of a militant attack or ambush initiated from an underground tunnel originating from Mexico.

The tunnel entries built by Hamas and ISIS are about 1 meter wide and go as deep as 100ft beneath the surface. Pneumatic jackhammers are often used to dig out the tunnels and workers cover about 2-3 meters a day using them. Militants usually employ skilled workers to do the job. These workers normally have some knowledge of the engineering and geological aspects that go into constructing a tunnel. The tunnels are often dug from the inside of a shelter or home, which provides operatives with more stealth. ISIS militants who have escaped enemy fire, often seek refuge in nearby villages and pay residents there to help them construct tunnels.

There are some hazards associated with the initial constructing process, such as cave-ins and collapses. It's common for workers to perish during the excavation process. Collapses usually result from not waiting long enough after a torrential rainstorm to resume tunnel construction. As a result, soil erosion, which often compromises the landscape, puts workers underground at risk of being trapped after the collapse.

Casualties have ironically allowed Hamas to improvise on the underground construction process and gain a greater understanding of it altogether. Hamas has in turn managed to equip their tunnel system with electricity, concrete walls and ceiling, and is able to conduct communications. Hamas has been able to smuggle concrete into Gaza and has used it to fortify their tunnel system. ISIS, on the other hand, has a less featured system, but has learned over the years how to survive direct air assaults by hiding underground. It's likely that ISIS will build their tunnels based on the proximity of gas field locations. Many of the recent ambush attacks by ISIS against Syria have occurred near oil and gas fields. Oil and gas are both important elements of warfare, as they allow militants to maintain electrical, logistical, and communication channels.

Looking at what we've gathered so far in terms of side 1 and side 2 of health, we can begin the process of placing "gravity" itself. With elements like the Sun, and oxygen on side 1, and carbon dioxide on side 2, we can safely place gravity on side 2. Anti-gravity, likewise, would go on side 1. We can also add air power, thrust, propulsion to side 1 since those are anti-gravity concepts. This sinking aspect of gravity as it relates to an object toward the earth affirms its placement with carbon dioxide on side 2 since there is more carbon dioxide underground than above ground. There is also less oxygen underground.

So if we look at the opposing aspect relating to above-ground and underground, we see that the deeper one goes under the surface, the more ineffective all above surface components become as it relates to any influence it could have on subterranean components. This aspect applies both ways. To apply analogously the idea that a component from side 1 or side 2 can eventually overcome and overpower the components of its opposite side, we must presume that more of one or the other would propose a threat to its opposite. More penetration into the earth does not necessarily threaten the components or situation above ground, or vice versa, a higher elevation above the surface doesn't necessarily threaten the underground components.

The biggest threat to any underground structure is heavy rain. In most tunnel collapses, heavy rain is often the main cause. Geologically speaking, rain effects are often deterred by things such as concrete or

mulch which shields the soil from the effects of heavy rain or wind. In tunnel collapses, after the rain water hits the soil, it eventually infiltrates its way to the tunnel's surrounding rock, weakening it though erosion. Water gets into cracks and joints, eventually causing the rocks to break open and split apart. At the moment one can presume that precipitation is perhaps the greatest threat to underground tunnels. This in itself is a form of intelligence since it's likely that, because of this, militants will not shelter or construct underground during days of heavy rain. They may also, as a way to improvise, start constructing tunnel paths directly underneath surface paths formed with concrete or asphault, i. e. city streets. This would lessen the effect of heavy rain on tunnel stability. However, the lack of arable land and prevalence of prolonged droughts in the middle east still allows for uninterrupted construction of sustainable tunnels there. This allows us to comprehend the notion that underground structures would be more operational or populated during seasons of drought as opposed to seasons of precipitation. It's likely that militants in the middle east have already planned in advance for climate factors.

The approach to this field of conflict should be applied with some discrimination since factors like 'what the tunnels are being used for' need to be taken into consideration. Smuggling purposes would not warrant a counter-terrorism search and destroy operation since civilians are often employed and in many cases forced into transporting cargo to and from. If the tunnels are used for both, then it's all the more difficult to discriminate accordingly. Ideas have been presented which propose that soldiers infiltrate on foot into the actual tunnels and conduct operations from there. The challenges to this idea is that signals are often weaker or disabled below the surface, making it difficult to maintain good communications. Another issue is the question of soldiers having the necessary oxygen to carry out prolonged subterranean missions. Beneath the surface, oxygen levels are usually lower, which puts soldiers at risk and endangers the mission. There is also the potential of carbon monoxide poisoning should soldiers be exposed to heavy smoke. Gas mask and other oxygen-storing equipment would be ineffective in protecting personnel against a carbon monoxide build-up within such an enclosed space. Ideally being able to detect and display tunnels on above surface radar makes for a more astute counter tunnel strategy since personnel would be less required to enter the

underground fortification. They can simply wait for operatives to exit the underground structure before apprehending the situation. This makes it easier to discriminate exactly who goes into and out of the tunnels.

While jihadist cross-border tunneling is an issue for Israel's national security, it still ranks below the dangers presented by incoming rocket fire from militants in Gaza. While the Iron Dome is increasingly effective in countering enemy rockets, Israel is still faced with the possibility of high civilian casualties and also the geopolitical implications of defense. The Iron Dome presents a conundrum from a geopolitical perspective. Hamas is able to calculate how firing rockets at civilians--with these rockets being intercepted by the Iron Dome defense——should allow for more justification later on should Israel retaliate and cause Palestinian civilian casualties in the process. The success of the Iron Dome in containing and intercepting incoming rocket fire often de-magnifies militant aggression toward the civilian population. In this case, Israel should get credit for not allowing enemy rockets to kill Israeli civilians, negating a prospect that would conveniently allow for Israel to garner more international support in defense against militants in Gaza. The militants in Gaza are wise in recognizing the need for international sympathy and their calculated strategy has brought forth the necessary aid needed to build up their reserves, and the international support needed to justify their rocket attacks on Israel. The geopolitical aspects are heading in the direction of Israel having to call off any excursions in Gaza territory, while at the same having the burden of defending themselves against rocket attacks, with those terrorist attacks having no implication on the international outlook of militant aggression against Israeli civilians. Under this paradigm, actual terrorism becomes defined when the terrorists are successful. When they are thwarted, the attempted terrorism has no bearing on the perpetrator. This factor puts more pressure on the application of precision and the technology needed to apply it, since Israel will not seek justification by allowing Israelis to be killed by rocket fire. It should be said that allowing attacks against one's own territory and civilians was a tactic commonly used by armed forces throughout history.

The ability to map out on radar the location of all underground structures within a given area is the ideal scenario regarding new technologies. This would allow for personnel to optimally discriminate

who goes into and out of the structures. It would also allow them to plan in advance an effective approach in neutralizing any dangers surrounding the operational intent within the tunnels. This neutralizing aspect may serve as a more ideal approach since the existence of the tunnels may be an asset in the future and simply keeping the tunnels under observation, as opposed to destroying them, can provide an added defense measure in an unfavorable event. The tunnels can also be re-fortified and sustained for later use or as a geological study, saving both time and money.

The above surface structures provide some protection to underground tunnels. Concrete and Asphalt reduce the effects of heavy rain on the soil and averts the possibility of rock erosion beneath the surface, which is normally a factor that causes many underground structures to collapse. This makes concrete the number one area of interest in locating the existence of an underground tunnel. If the workers are apprehending the effects of precipitation, then it's likely that they have improvised by routing tunnels to follow an alignment with the above surface concrete. If that is not the case, then they would have improvised to only construct or inhabit tunnels during dry seasons, and reduce operations there during wet seasons. Gaza militants fortify their tunnels with concrete surroundings, however due to creep (which happens to concrete under sustained load), concrete can easily collapse underground. Heavy soil and rain infiltration into underground rocks cause rocks to break, losing their ability to support the surrounding soil. The wet heavier soil then places more pressure on the underground tunnels, eventually causing them to collapse.

Compared to other places, the Middle East presents less risk of tunnel collapse, due to the prevalence of droughts. Underground tunneling would be much more hazardous in tropical climates where it rains regularly, making the construction of underground tunnels aligned to the above ground concrete much more imperative. A good contingency for urban areas would be the use of rods that penetrate deep into the ground at different intervals in a city through concrete or asphalt surfaces, allowing for possible detection should diggers take into consideration the location of concrete surfaces as they construct a tunnel. Paved roadways in urban areas provide a security aspect for

tunnelers and a security risk for cities, should militants apply this type of warfare.

In referencing the side 1 and 2 of health as it relates to air power and tunnel fortifications, we can ruminate on the propulsion and thrust anti-gravity aspects of side 1 as direct antagonists to pro-gravity underground construction on side 2. In propulsion and thrust, pressure is applied to the surface before it breaks the gravity force. This pressure can be applied to side 2 since it goes with the gravitational force. The after-effects of it should define thrust and propulsion on side 1 since gravity is antagonized upon lift. We see in tunnel collapses how pressure from heavy wet soil and surrounding rock degradation has a primary effect. It's analogous to how symptoms arising from side 2 components are exacerbated by addition of another component of side 2, or vice versa, symptoms associated with side 1 exacerbated by addition of other components on side 1. We see in this case, that destruction against the underground component means the application a similar component setting off a toxic effect. However, the void in a tunnel can be applied to side one since is does contain air, and the gravitational pressure surrounding it-as a component of side 2-can serve as the direct antagonist. If we line up our list it should look like this.

Side 1 of health	Side 2 of health
Air power	Underground structure
Upward effect of Propulsion	Downward Pressure of propulsion
Thrust	Downward pressure of thrust
Anti-gravity	Gravity
flying	digging
void in a tunnel	surrounding soil

One can gather that digging out a tunnel beneath the earth's surface is actually the application of a side 1 component against side 2, since the void created brings in oxygen from above the surface. The tunnel construction itself becomes the result of an action against gravitational forces, especially when excavated horizontally. This would call for certain parts of the excavation process to be on side 1. The greater the void, the more it contributes to the side 1 component of above surface

oxygen. Correspondingly, the gravitational effect from hollow ground is much less than that from very dense ground. The density of the earth antagonizes anti-gravity intentions. The location of someone in a void underground is in a position of antagonism to gravity itself, which is why when soil becomes more dense, the load on the underground tunnel increases, putting it at risk. With this, we can place the void within a tunnel on side 1 and the surrounding soil on side 2. The antagonism to air power is not the tunnel, but the underground soil surrounding the tunnel. We can thus presume that an aerial object would have to contend with a greater degree of gravitational pull when positioned above a more dense part of the earth. There are many myths and legends that speak of aircraft disappearing when navigating through certain locations on earth. Even in this regard, one can hypothesize that the aircraft may have encountered some supernaturally dense terrain that could have theoretically yanked it from the sky or in another aspect, supernaturally hollow terrain that could have propelled the aircraft into outer space. Of course that example is just conjecture on an extreme hypothetical scenario.

The implication of search and destroy, without due discrimination, could undermine any incurred security benefit. The proposal of search, entry, and neutralization becomes a very plausible approach when taking geopolitical issues into account. The importance of discrimination in this type of warfare cannot be understated. In fact, the often irresponsible use of drones by the US in places like Africa and the Middle East has given rise to militant aggression and fostered an international urgency for fair tactics and greater precision. Since most tunnel construction is initiated from the inside of a building as a way to avoid detection, the security apparatus in place can start making efforts to install seismic senors, which senses the ground vibration of the earth. These can be installed at various locations no different than the way traffic lights are set up in urban areas. This works at both the foreign and domestic level. The vibration effect of drilling can be detected by a nearby sensor, alerting authorities of possible tunnel construction in the area. This approach attempts to locate the initial tunnel construction process, which may be more feasible than trying to locate tunnels already built. Since jackhammers are normally used to construct them, detecting the subsequent ground vibrations while honing in on the actual drilling site is easily achieved with today's technology. Without

this aspect accommodated into such a program, a huge void would linger should technology attempt to risk time and money in innovations that may take a while to develop. The added time there would provide opportunity for construction of more underground fortifications, an unfavorable prospect from a national security perspective. Focusing first on detecting ground vibrations from the initial drilling process can prevent the proliferation of underground networks. There is a containment aspect to this strategy that should be considered, even if militants could simply work around it by constructing tunnels from within a tunnel. This argument is supported by the fact that the existence of tunnels in the present tense has not yet reach a tipping point. The security apparatus has enough time to begin the process of prevention, as opposed to elimination of existing tunnel structures. The idea is that employing the use of seismic sensors at various locations to detect ground vibrations that come from drilling holes is much easier than trying to develop technology that would detect and locate already-operational tunnels. While sound barriers could theoretically reduce the noise effect of drilling, it cannot deter the vibration aspect that would arise from it. One has to presume that the ground vibration signal detected from the use of jackhammers can be displayed on a device situated within a certain proximity. Installing this type of technology requires thinking ahead along with application before the fact.

A technology that could possibly help detect operational tunnels would be acoustic sensors, assuming the tunnel is fully operational with no more drilling applied to its development. Footsteps would be the only noise that could give away its location. However, in order for this to be developed, one would have to undertake their own tunnel construction and develop algorithms that account for footstep noises at various depths beneath the surface along with its position in relation to the sensor. The project would involve the construction of multiple tunnels at various depths with the sensors placed at various depths and distances from the footsteps. Each sensor would detect the footstep noise at each depth and distance. Algorithms can then be developed that would identify the footstep noise and account accordingly for the distance/position from the sensor. This would help in the noise discrimination aspect of accurate detection and allow one to locate the exact position of the tunnel. A distance metric should be formulated for real-time application. If multiple sensors are alerted, then the algorithm

and distance metric should allow one to be able to trace the path of the tunnel.

While there are challenges in the use of acoustic sensors to apprehend footstep noises among other noises within a certain environment, the use of acoustic sensors underground would make for an easier discrimination process, presuming that there is less background noise underground. It's possible that this technology can be used in conjunction with seismic sensors.

Personnel breach of a tunnel structure poses significant health hazards. One is the possibility of tunnel collapse under sustained load. Mitigating the chances of being in the tunnel during a collapse would come with keeping a close eye on climate factors like precipitation, which is a primary cause of tunnel collapses. Making it a point to avoid tunnel excursion during times of heavy rainfall increases the likelihood of survival and reduces the risk of collapse while being present in the tunnel. Another issue is the possibility of carbon monoxide poisoning should a fire break out in the tunnel. The protective masks don't protect against smoke. Ethanol vapor inhalation could provide some protection against carbon monoxide exposure. In a study involving rats, ethanol intoxication was found to have a protective effect against carbon monoxide poisoning. This idea can be applied underground if the ethanol, which is a flammable agent, is sealed safely away from any possible contact with incendiary materials or ignition factors. Flammable materials are recommended to be stored in areas where there is strong ventilation. Underground structures, however, usually lack in this regard. The only workaround is for operatives to enter underground tunnels with alcohol in their system. The drawback of this is that the alcohol would contribute to reductions in judgment and reaction time in the event of a serious emergency. This is not the ideal state for anyone to be in during a risky mission, but it's the only way to safely make use of alcohol's protective effect against carbon monoxide poising in a poorly ventilated enclosed space. This also offers the idea that a trade off may be necessary—giving up some reaction time and judgment in exchange for extended time in the tunnels. Certainly during the breaching process, ethanol vapors could be applied to breathing apparatuses. The importance of a workaround is mediated by the fact that personnel would be able to stay underground much longer. If we

revert back to the side 1 and 2 of health(pg 16 & 17 of this appendix), we already see that oxygen and alcohol are placed on the same side, affirming alcohol as a proponent of oxygen and an antagonist against anti-oxygen elements. So it makes sense as to why ethanol, which is the main ingredient in alcohol, would provide protection against carbon monoxide poisoning. Correspondingly, there could other factors on side 1 that may protect a person in low oxygen environments.

Another challenge facing the underground operations is the adequacy of communications equipment. Signals are often lost at very deep locations beneath the surface of the earth. Thick layers of earth embedded between the tunnel and the surface is the major factor in signal blockage. Radio signals have a hard time penetrating those thick layers, which obstruct the necessary communications. In urban environments, radio signals encounter similar obstruction in areas where the receiver is positioned behind or above thick or multiple layers of concrete. In skyscrapers, radio repeaters have to be installed in order for communications to reach personnel located on higher platforms. Signal strengthening is a key element in tunnel communications, however personnel could encounter underground structures or situations where these signal strengtheners won't be handy.

Sound travels through the air, water, and many solid structures. When a person speaks into a walkie-talkie, that sound is converted into radio waves or signal and transmitted with the antenna. A walkie-talkie using the same channel can receive that transmission with their antenna and decode the sound from the signal. In underground situations, the signal transmitted is often blocked by the thick barrier of earth between the tunnel and surface. A creative workaround would be finding a way for the sound to be converted into bass or vibration before it's converted into a radio signal and transmitted via antenna. The hypothesis here is that the signal's penetration power is directly related to the sound's penetration power. An example would be how the bass of music or voice can still be heard behind a thick barrier, even when the sound of the voice or music can no longer be heard. There would have to be a correlation where as the transmitted converted sound portion of the signal could not be detected by the receiver, the converted bass portion could. Just as there is a point where sound cannot be heard beyond a certain amount of thickness of a barrier, correspondingly there must be

a point where the radio signal cannot be received beyond a certain amount of thickness of a barrier. When bass is applied to the sound, the sound itself is decipherable beyond the sound blocking barrier through the vibration caused by the bass. One can presume that this bass vibration converted to radio signal would allow a for a transmission that would allow the receiver to pick up the signal of the bass vibration beyond the limit of the signal of a regular voice sound, just as the bass itself allowed for the sound to be deciphered beyond the limit of where the sound could penetrate.

A number of people have reported positive results using flat antennas in their basement, an area in buildings where reception is a problem for a number of devices. Based on this information, one can presume that mounting increasingly thin antennas on communication devices could have a positive effect on signal detection from underground tunnels. Mounting antennas on a PVC pipe is also a typical method used to boost signal reception. Incorporating these factors into tunnel communication devices could provide some progress toward eventual breakthroughs.

In the present day, the Middle East is perhaps the greatest example of how effective tunnels are against urban defenses. Beginning in late 2013, ISIS was able to lay siege and occupy large swaths of territory in Iraq and Syria before eventual US intervention in Iraq in 2014 and Russian intervention in Syria in 2015. Even after encountering numerous aerial bombardments by US and Russian Air Forces in Iraq and Syria respectively, ISIS has still managed to survive with the use of tunnels, even launching successful ambushes against Syrian regime forces, a midst their dwindling numbers, thus prolonging the conflict and effectuating an urgency for greater battlefield discipline. Many of the armed forces around the world have recognized the threat and began making concessions to deal with the problem. Israel faces the greatest challenge of dealing with the threat of underground operations by enemy forces. Hezbollah and Hamas have both made use of tunnel warfare and at numerous junctures, successfully infiltrated Israeli territory. Israel has bolstered their defense in response and used technology over the years to locate a number of cross border tunnels. The dangers of kidnappings, planting explosives, hostage taking, and all-out sieges are posed by effective use of underground tunnels. In the West, many underground structures have been built, but mostly for drug

smuggling and immigration purposes. There is at least one instance of a tunnel being built for a bank robbery, which ended up failing due to collapse as a result of heavy rainfall. Portions of the tunnel likely aligned with surface terrain comprised of dirt. When it rained, the water penetrated the soil and eroded the surrounding rock of the tunnel, causing it to collapse. It's likely in the future that attack tunnels will be built to align with surface concrete areas to reduce the risk of collapse from heavy rainfall.

The issue of heavy rainfall brings to light the importance of knowing the surface terrain above the tunnel structure. Surface terrain covered in concrete or mulch is at less risk of compromising underground tunnel stability than surface terrain made up of soil or regular dirt. The concrete and mulch limits the level of water that can penetrate the soil and the tunnel's surrounding rock. When overexposed to water, rocks can break and cause tunnel collapse.

We can only assume that many attack tunnels will not be stabilized with rock bolts. Rock bolts are simply long anchor bolts that are drilled into the ceiling of a tunnel in order to bolster stability and prevent collapse from sustained load.

Technology that would allow underground personnel to detect the type of surface terrain aligned directly above their tunnel position could help with safety protocols regarding unstable areas of the tunnel structure. We posit that tunnel areas aligned with soil or dirt terrain would be areas where there is a high risk of collapse. Tunnel areas aligned with surface terrain covered in concrete or asphalt would be at less risk of collapse.

Focus areas should be narrowed down to regions where rainfall is minimal, since less rainfall correlates with less risk of tunnel collapse. Lack of knowledge on this factor could imperil those embarking on tunnel projects in more tropical areas if they haven't improvised and taken into account the importance of tunnel alignment with concrete covered surface terrain on tunnel stability. Yet, it's important to note that concrete does erode, but extremely slowly. It can take hundreds or thousands of years of being exposed to rainfall for it to began showing signs of wear. This may be a reason why Hamas uses cement for their

underground tunnels. However, there is still a chance of collapse if the surrounding rock erosion outside of the underground concrete tunnel increases the overall load on the concrete itself. The increased sustained load increases the amount of creep and compromises the overall stability of the tunnel.

Those seeking to imitate the Middle East or the Mexican border in terms of constructing underground structures must take into account that the lack of rainfall in those areas is a major asset for tunnel construction. Embarking on such an endeavor in tropical areas will require more risk, time, equipment, knowledge, and patience.

The most optimal idea concerning the tracking of tunnels would be if the tunnels can be discerned from satellite imagery or above surface radar. It was mentioned before that the greatest natural enemy against underground tunnels is heavy rain. Upon research, it occurs that the greatest natural exposer of underground tunnels are sinkholes. If there is a way for surveillance to spot the presence of sinkholes on its display apparatus, it could lead to intelligence regarding the location of a tunnel. Sinkholes have exposed the location of numerous underground excavations. The technology used by NASA to foresee sinkholes in advance could correlate into technology used to locate tunnels from observing radar systems. In 2014, NASA used technology that bounced signals off the ground and measured the differences in the phase of the waves returning to the satellite. Ground layer surface deformity moved horizontally toward where the sinkhole eventually formed. As a result, horizontal surface deformations became the key indicator of sinkhole formation, allowing for a possibility that tunnels could be detected remotely.

Section IV - How Israeli soldiers and civilians can detect and evade drone strikes using javascript code

Aerial Object Detection

by Anthony of Boston

Wait for the model to load before clicking the button to enable the webcam - at which point it will become visible to use. The app will beep when an aerial object is located. The longer an aerial object is hovering near you, the longer the beeping noise. For soldiers, this could mean that a drone is targeting them. Ideally, soldiers would use the app on their cell phones and attach the device to the top area of their vehicles or to their body while sleeping in the trenches. Keep mind that cell phone wireless connectivity must remain "off" in combat environments. In civilian environments, the cell phone, with wireless turned on, could be placed on rooftops. With internet access, a user could view the aerial scene remotely with facebook live.

Below is the HTML code for the Aerial Object Detection App that you can copy and paste and test in html:
